Title: NESHAP for Miscellaneous Coating Manufacturing (Renewal)
ICR Numbers: EPA ICR Number 2115.03, OMB Control Number 2060–0535.

ICR Status: This ICR is scheduled to expire on June 30, 2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Respondents are owners and operators of miscellaneous coating manufacturing operations. Respondents must submit notifications and reports and maintain records required by the

General Provisions (40 CFR part 63, subpart A). Recordkeeping of parameters related to air pollution control technologies is required. The reports and records will be used to demonstrate compliance with the emission limitations and work practice standards.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 296 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Miscellaneous coating manufacturing facilities.

Estimated Number of Respondents: 133.

Frequency of Response: Initially, occasionally, semiannually and annually.

Estimated Total Annual Hour Burden: 167,572.

Estimated Total Annual Cost: \$17,007,914, which includes \$14,192,714 in labor costs, \$30,000 in capital/startup costs, and \$2,785,200 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is no change in the calculation methodology for labor hours or costs to the respondents in this ICR compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for respondents is very low, negative, or non-existent. Therefore, the labor hours and cost figures in the previous ICR reflect the current burden to the respondents and are reiterated in this ICR.

In the previous ICR renewal, the approved annual hour burden was 167,832 hours. The actual annual hour burden as calculated in the previous ICR was 167,572 hours. By this ICR, the

Agency is requesting approval of 167,572 hours.

Dated: May 3, 2010.
