

¹ Prepared by the U.S. Census Bureau, U.S. Department of Commerce (Census Bureau), from three-year estimates from the 2006, 2007 and 2008 American Community Surveys (ACSs). These estimates, like those derived from any survey, are subject to two types of errors: (1) Non-sampling Error, which consists of random errors that increase the variability of the data and non-random errors that consistently direct the data into a specific direction; and (2) Sampling Error, which consists of the error that arises from the use of probability sampling to create the sample.

² These figures were calculated by the U.S. Department of Health and Human Services, Administration for Children and Families, Office of Community Services, Division of Energy Assistance (DEA) by multiplying the estimated State median income for a four-person family for each State by 60 percent.

³ To adjust for different sizes of family, 45 CFR 96.85 calls for multiplying 60 percent of a State's estimated median income for a four-person family by the following percentages: 52 percent for one person, 68 percent for two persons, 84 percent for three persons, 100 percent for four persons, 116 percent for five persons, and 132 percent for six persons. For each additional family member above six persons, 45 CFR 96.85 calls for adding 3 percentage points to the percentage for a six-person family (132 percent) and multiply the new percentage by 60 percent of a State's estimated median income for a four-person family.
