Title: NSPS for Incinerators (Renewal).

ICR Numbers: EPA ICR Number 1058.10, OMB Control Number 2060-0040.

ICR Status: This ICR is scheduled to expire on July 31, 2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This Information Collection Request (ICR) renewal is being submitted for the NSPS for Incinerators (40 CFR part 60, subpart E), which were promulgated on July 25, 1977. These standards apply to incinerators that charge more than 45 metric tons per day (50 tons per day) of solid waste for the purpose of reducing the volume of the waste. Solid waste is defined as refuse that is more than 50 percent municipal wastes.

Owners and operators of incinerators subject to NSPS must notify EPA of construction, reconstruction, anticipated and actual startup dates, and results of performance tests. Records of performance test results, shutdowns, and malfunctions must be maintained. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all sources subject to NSPS.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 51 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes

of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Incinerators.

Estimated Number of Respondents: 82.

Frequency of Response: Initially and occasionally.

Estimated Total Annual Hour Burden: 8,393.

Estimated Total Annual Cost: \$998,858, which includes \$793,858 in labor costs, no capital/startup costs, and \$205,000 in operation and maintenance (O&M) costs.

Changes in the Estimates: There are no changes to the labor hours for the Respondents in this ICR as compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the respondents is very low, negative or non-existent.

However, there is an increase in respondent labor costs due to labor rate increases from the year 2003 to the most recent available labor rate data.

Dated: May 7, 2010.

John Moses,

Director, Collection Strategies Division.

Clean Water Act Section 303(d): Availability of Los Angeles Area Lakes Total Maximum Daily Loads (TMDLs)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: This action announces the availability of EPA proposed total maximum daily loads (TMDLs) for Echo Park Lake, Lincoln Park Lake, Peck Road Park Lake, Lake Calabasas, Lake Sherwood, Puddingstone Reservoir, Legg Lakes, Santa Fe Dam Park and El Dorado Park Lakes to address nutrient, mercury, chlordane, dieldrin, DDT,

PCB, and trash impairments pursuant to Clean Water Act Section 303(d)(1), and requests public comment. Section 303(d)(1) requires that states submit water quality planning documents called total maximum daily loads for impaired waters for which existing technology-based pollution controls are not stringent enough to attain or maintain state water quality standards. EPA must approve or disapprove the State's submitted TMDLs.

EPA is providing the public the opportunity to review the proposed TMDLs. EPA is establishing these TMDLs in lieu of California because of deadlines associated with the consent decree described under **SUPPLEMENTARY INFORMATION**. EPA will prepare a responsiveness summary that demonstrates how public comments were considered in the final TMDL decisions. The responsiveness document will be available along with the final TMDLs at EPA's Region IX Web site below.

DATES: Comments must be submitted to EPA on or before June 28, 2010.

ADDRESSES: Comments on the proposed decisions should be sent to Valentina Cabrera Stagno, Water Division (WTR-2), U.S. Environmental Protection Agency Region IX, 75 Hawthorne Street, San Francisco, CA 94105, telephone (415) 972-3434, facsimile (415) 947-3537, e-mail cabrera-stagno.valentina@epa.gov. Oral comments will not be considered. Copies of the proposed TMDLs will be available on EPA Region IX's Web site at <http://www.epa.gov/region9/water/tmdl/progress.html> or by writing or calling Valentina Cabrera Stagno. Underlying documentation comprising the record for these TMDLs is available for public inspection at the above address.

FOR FURTHER INFORMATION CONTACT: Valentina Cabrera Stagno at (415) 972-3434 or cabrera-stagno.valentina@epa.gov.

SUPPLEMENTARY INFORMATION: Section 303(d) of the Clean Water Act requires states to identify water bodies that do not meet water quality standards and then to establish TMDLs for each water body for each pollutant of concern. TMDLs identify the maximum amount of pollutants that can be discharged to water bodies without causing violations of water quality standards. Echo Park Lake, Lincoln Park Lake, Peck Road Park Lake, Lake Calabasas, Lake Sherwood, Puddingstone Reservoir, Legg Lakes, Santa Fe Dam Park and El Dorado Park Lakes are included on the State of California's Section 303(d) list

of polluted waters due to water quality impacts associated with nutrients, mercury, chlordane, DDT, PCBs and trash. EPA will establish TMDLs for these lakes by March 2012 because of deadlines under a consent decree (*Heal the Bay Inc., et al. v. Browner* C 98-4825 SBA, entered March 24, 1999).

Dated: April 27, 2010.

Alexis Strauss,

Director, Water Division, EPA Region IX.

When finalizing the draft document, EPA intends to consider any public comments that EPA receives in accordance with this notice.

EPA is also announcing a listening session to be held on June 16, 2010, during the public comment period for this draft document.
