SUPPLEMENTARY INFORMATION:

Background

A draft Programmatic Environmental Assessment (PEA) for the deployment and operation of High Energy X-Ray Inspection Systems (HEXRIS) at sea and land ports of entry has been completed by the U.S. Customs and Border Protection (CBP), Office of Information and Technology, Laboratories and Scientific Services, Interdiction Technology Branch. The draft PEA is available for public comment.

HEXRIS is a non-intrusive inspection technology that is used to aid in inspecting high-density cargo containers for contraband such as illicit drugs, currency, guns, and weapons of mass destruction. To assist in meeting CBP's mission requirements of securing the borders of the United States while simultaneously facilitating legitimate trade and travel, HEXRIS units are proposed to be deployed and operated at both sea and land ports of entry across the U.S. and Puerto Rico. HEXRIS fills a unique niche in the types of inspection tools used by CBP at the nation's ports of entry. HEXRIS is capable of penetrating dense cargo loads that cannot otherwise be examined with other technologies such as gamma imaging systems or low-energy X-ray systems. HEXRIS will also assist in fulfilling the requirement for the 100% scanning of containers entering the U.S. as directed in the Security and Accountability for Every (SAFE) Port Act of 2006. Public Law 109–347 (Oct. 13, 2006).

The draft PEA addresses the potential impacts from the installation and operation of HEXRIS at various ports throughout the United States for the purpose of conducting non-intrusive inspections of high density cargo containers. Evaluations were conducted on various resources present at the ports, including: Climate, soils, water quality, air quality, vegetation, wildlife, noise, infrastructure, aesthetics, and radiological health and safety.

Next Steps

This process is being conducted pursuant to the National Environmental Policy Act of 1969 (NEPA), the Council on Environmental Quality Regulations for Implementing the NEPA (40 CFR parts 1500–1508), and Department of Homeland Security Management Directive 5100.1, *Environmental Planning Program of April 19, 2006*.

Substantive comments concerning environmental impacts received from the public and agencies during the comment period will be evaluated to determine whether further environmental impact review is needed in order to complete the final PEA. Should CBP determine that the implementation of the proposed action would not have a significant impact on the environment, it will prepare a Finding of No Significant Impact (FONSI). The FONSI would be published in the **Federal Register**.

Should CBP determine that significant environmental impacts exist due to the action, CBP will prepare a Notice of Intent (NOI) to prepare an Environmental Impact Statement (EIS).
