

the subject firm since: (1) The subject firm has not imported the products like and directly competitive with those it formerly produced—the products are being manufactured in an offshore location and, rather than being imported into this country, are being consumed outside of the United States; and (2) the customer itself and not the subject firm has shifted production to an offshore location.

The petitioner did not supply facts not previously considered; nor provide additional documentation indicating that there was either (1) a mistake in the determination of facts not previously considered or (2) a misinterpretation of facts or of the law justifying reconsideration of the initial determination.

After careful review of the request for reconsideration, the Department determines that 29 CFR 90.18(c) has not been met.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed in Washington, DC this 14th day of May 2010.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC or Commission) is considering an application dated November 10, 2009, from the Department of Energy (applicant or DOE) for the renewal of its Special Nuclear Material License No. SNM-2504, under the provisions of 10 CFR Part 72, for the receipt, possession, storage and transfer of spent fuel, reactor-related Greater than Class C (GTCC) waste and other radioactive materials associated with spent fuel storage at the Fort St. Vrain Independent Spent Fuel Storage Installation (ISFSI), located at the Fort St. Vrain site in Platteville, Colorado. If granted, the renewed license will authorize the applicant to continue to store spent fuel in a dry cask storage system at the applicant's Fort St. Vrain ISFSI. Pursuant to the provisions of 10 CFR 72.42, the renewal term of the license for the ISFSI would be twenty (20) years. This application was docketed under 10 CFR Part 72; the ISFSI Docket No. is 72-9.

An NRC acknowledgment review, documented in an electronic mail to DOE dated December 22, 2009, found that the application contains sufficient information for the NRC staff to begin its technical review. The Commission will approve the license renewal application if it determines that the application meets the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act) and the
