Assistance provided to rural areas under this program may include the provision of loans and grants to rural Microenterprise Development Organizations (MDOs) for the provision of microloans to rural microenterprises and microentrepreneurs; provision of business-based training and technical assistance to rural microborrowers and potential microborrowers; and other such activities as deemed appropriate by the Secretary to ensure the development and ongoing success of rural microenterprises.

C. Definition of Terms. The definitions applicable to this Notice are published at 7 CFR 4280.302.

II. Award Information

A. *Type of Award:* Loan and/or Grant.

B. *Fiscal Year Funds:* FY 2010.

C. *Funding Availability:* The total amount of available program level in Fiscal Year 2010 is \$45.1 million. Of this total, \$36.2 million will be initially available for loans, \$7.6 million will be initially available for Microlender technical assistance grants, and \$1.3

million will be initially available for Technical assistance-only grants. Exact funding is dependent on the quality of applicants for each funding type.

Any funds not awarded under this notice will be carried over into Fiscal Year 2011. Applications received after July 16, 2010, will be reviewed and evaluated for funding beginning October 1st. Applications for the first quarter are due September 30th. In the event some of the program funds allocated for the first quarter of Fiscal Year 2011 are not awarded, the remaining funds will be carried over to the second quarter.

D. *Approximate Number of Awards:* 82.

E. *Awards:* The minimum loan amount an MDO may borrow under this program is \$50,000. The maximum loan any MDO may borrow in any given year is \$500,000.

Microlender Technical Assistance grants will be limited to an amount equal to not more than 25 percent of the total outstanding balance of microloans made under this program and active by the microlender as of the date the grant is awarded for the first \$400,000 plus an additional 5 percent of the loan amount owed by the microborrowers to the lender under this program over \$400,000 up to and including \$2.5 million. Funds cannot be used to pay off the loans. During the first year of a microlender's operation under this program, the percentage will be determined based on the amount of the loan to the microlender, but will be disbursed on a quarterly basis based on the amount of microloans made. Any grant dollars obligated, but not spent, from the initial grant, will be subtracted from the subsequent year grant to ensure that obligations cover only microloans made and active.

SUPPLEMENTARY INFORMATION:**Purpose and Need for Action**

The Purpose of the project is to: (1) Improve wildlife habitat for white-headed woodpeckers, by restoring appropriate forested stands to historical range of variability, and improve habitat for other wildlife species as appropriate; (2) reduce wildland fire hazard in forested stands with conditions that depart from the historical range of variability; (3) encourage woody biomass utilization as a revenue source to for restoration goals; and (4) contribute to the economic vitality of the communities adjacent to the Payette NF.

Land management activities over the last century, such as fire suppression, timber harvest (especially large diameter ponderosa pine) and road construction have affected forest, grassland, shrubland plant species composition and structure, and watershed conditions. The need for this action is move landscape conditions toward the historical range of variability, and to meet 2003 Payette National Forest Land and Resource Management Plan (Forest Plan) direction.

Proposed Action

The Proposed Action includes the following restoration treatments: (1)

Harvesting of sawtimber and biomass (woody material not meeting sawtimber specifications) on 4,800 acres by thinning from below to reduce tree density, crown spacing, and ladder fuels followed by underburning to promote ponderosa pine and other fire-resistant tree species reproduction, reduce non-fire resistant vegetation, and reduce fuel accumulation; (2) harvesting sawtimber and biomass on 700 acres by regeneration harvest treatments followed by prescribed burning to promote fire resistant tree species reproduction, reduce non-fire resistant vegetation, and reduce fuel accumulation; (3) underburn 2,800 acres of additional timber vegetated stands not proposed for harvest and use planned wildland fire on 12,100 acres of grass, brush, scattered timber or quaking aspen stands; and (4) thinning of 4,500 acres of tree plantations which would include some removal of biomass. Harvesting activities would be accomplished using tractor, tractor/jammer, and skyline methods. Skid trails would be designated to concentrate use in a limited amount of areas and reclaimed following harvest. There would be no harvest within 30' of intermittent streams or within 120' of perennial streams. There would be no equipment entry in riparian conservation areas (RCAs) except on existing roads or skid trails approved of in advance by the District Hydrologist or Fisheries Biologist.

To facilitate access, approximately 6 miles of temporary roads would be constructed where needed to access harvest units and landings and decommissioned after use. Approximately 5 miles of existing non-National Forest System roads would be converted to National Forest Service System roads. There would be no permanent road construction in the project area with this proposal.

To improve watershed conditions and fisheries habitat, the proposed action includes: (1) The upgrade of culverts that are undersized and restrict passage of fish and other aquatic organisms, (2) road improvement such as improving drainage and surfacing and (3) the decommission of old roadbeds that are not needed for future management or public access to reduce levels of soils impacts, and reduce drainage and erosion problems.

Lead and Cooperating Agencies

Adams County, Idaho has expressed interest becoming a cooperating agency for this project and intends to submit such a request to the Payette National Forest in late May, 2010.
