a. *Type of Filing:* Declaration of Intention and Petition for Relief.

b. *Project No.:* D10–11–000.

c. *Date Filed:* March 26, 2010.

d. *Applicant:* Clark-Wiltz Mining.

e. *Name of Project:* Ganes Creek Hydrokinetic Pilot Project.

f. *Location:* The project would be located in Ganes Creek, in Yukon-Koyukuk, Alaska. The project would not occupy federal lands.

g. *Filed Pursuant to:* 18 CFR Part 24, § 24.1.

h. *Applicant Contact:* Mr. James Boschma, CEO Boschma Research, Inc., 138 Lawler Drive, Brownsboro, AL 35741, (256) 417–6048.

i. *FERC Contact*: Kelly Houff at (202) 502-6393, or Kelly.Houff@ferc.gov.

j. *Deadline for filing comments*: July 6, 2010.

All documents (original and eight copies) should be filed with: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

The Commission's Rules of Practice require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project.

Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

Comments may be filed electronically via the Internet in lieu of paper. The Commission strongly encourages electronic filings. See 18 CFR

385.2001(a)(1)(iii) and the instructions on the Commission's Web site (<http://www.ferc.gov>) under the "eFiling" link.

k. *Description of Project*: Clark-Wiltz Mining intends to deploy and test, for study purposes, a hydrokinetic device that would be located in Ganes Creek. The experimental hydrokinetic device would include: (1) A 1.4-meter-diameter, 9.9-meter-long, 1.4-meter-high, 15 kilowatt (kW) Cycloidal cross-flow turbine; (2) a debris guard and fish screen at the inlet; (3) a flow reduction diffuser, (4) 6 anchor pins that extend into the bedrock approximately 1 meter below the gravel riverbed; (5) anchor cables attached to a bulldozer onshore; (6) a marine cable to connect the hydrokinetic device to the distribution grid at the mining facility; and (7) appurtenant facilities. The hydrokinetic device would convert mechanical power from the river flow into electrical power without constructing a dam, reservoir, penstock, or powerhouse.

l. *Petition for Declaration of Intention*: Clark-Wiltz Mining asks that it be allowed, without a license under Part I of the Federal Power Act, to deploy, test, and study the type of facilities listed above, and use the power from the test device to supplement the diesel generators currently supplying the dozen buildings and shops at the Ganes Creek Mine. The Ganes Creek Mine is not connected to the interstate grid. Clark-Wiltz Mining would initially test the hydrokinetic device on a short-term basis during the initial 40 days after deployment, and continuously for 60 days before extracting the turbine from the creek before winter in Alaska. The deployment would provide the opportunity to evaluate turbine

performance and determine the suitability of operating a hydrokinetic system in the harsh Alaskan mountain environment.

Take notice that on May 20, 2010, Columbia Gulf Transmission Company (Columbia Gulf), 5151 San Felipe, Suite 2500, Houston, Texas 77056, filed an application, pursuant to section 7(c) of the Natural Gas Act (NGA), for a certificate of public convenience and necessity authorizing Columbia Gulf to construct and operate minor facilities required to isolate a portion of its existing transmission system to transport unprocessed gas (wet gas) near Centerville, Louisiana. The application is on file with the Commission and open for public inspection. To minimize construction associated with transporting wet gas and there is current unsubscribed capacity in Columbia Gulf's Erath and East Lateral system, Columbia Gulf proposes modifications of these laterals to reserve capacity for receiving wet gas and delivering it to Neptune in Centerville, Louisiana. The construction consists of taps, regulating facilities, valves, launchers and receivers, and minor piping located in Columbia Gulf's existing rights-of-way. Columbia Gulf estimates the construction costs of the proposed facilities to be \$4.2 million
