

BHI is an intermediate parent company of the licensee. BHI's subsidiaries include B&W NOG; Nuclear Fuel Services (NFS), which holds NRC license SNM-127 for its operations at Erwin, Tennessee; and BWX Technologies, which holds NRC license SNM-2001 for remediation of the former Shallow Land Disposal Area near Parks Township, Pennsylvania. B&W NOG is the primary holder for transportation packages under dockets 71-5086, 71-6357, 71-9250, 71-9280, and 71-9281. NFS is the primary holder for transportation packages under docket 71-0249. This Order applies to each of the above-referenced licenses.

In its Application, B&W NOG requested approval of a conforming license amendment that would replace references to MII and McDermott Incorporated in chapter 1 of the license with references to Babcock & Wilcox Technologies, B&W, and Babcock & Wilcox Investment Company to reflect the corporate spinoff and related actions that do not require NRC approval. No physical changes to the NRC-licensed facilities, and no operational changes in licensed activities will occur as a result of this Order.

Approval of the conforming license amendment will immediately follow the planned corporate spinoff.

Pursuant to 10 CFR 70.36, no right to possess or utilize SNM granted by any license, issued pursuant to the regulations in 10 CFR Part 70, shall be transferred, assigned, or in any manner disposed of, either voluntarily or involuntarily, directly or indirectly, through transfer of control of any license, to any person, unless the Commission shall, after securing full information, find that the transfer is in accordance with the provisions of the Atomic Energy Act of 1954, as amended (the Act), and shall give its consent in writing. After review of the information in the Application, and relying on the representations contained in the Application, the NRC staff has determined that B&W is qualified to hold the ownership interests previously held by BHI, and that the transfers of ownership and operating interests to B&W described in the Application, are consistent with applicable provisions of law, regulations, and orders issued by the Commission, subject to the conditions set forth below. The NRC staff has further found that the Application complies with the standards and requirements of the Act, as amended, and the Commission's rules and regulations set forth in Title 10 Chapter I. The license transfer and issuance of the conforming license amendment will not be inimical to the

common defense and security or to the health and safety of the public, or the environment, and all applicable requirements have been satisfied.

The findings set forth above are supported by NRC's Safety Evaluation Report, which is available for review ML101540125.

III

Accordingly, pursuant to Sections 161b, 161i, and 184 of the Act; 42 U.S.C. 2201(b), 2201(i), and 2234; and 10 CFR 70.36, *it is hereby ordered* that the Application described above related to the proposed corporate restructuring is approved, subject to the following condition:

Should the proposed corporate restructuring not be completed within one year from the date of this Order, this Order shall become null and void, provided, however, upon written application and good cause shown, such date may be extended by Order.

This Order is effective upon issuance.

For further details with respect to this Order, see the initial application dated May 4, 2010, May 14, 2010, and May 27, 2010, as well as the Safety Evaluation Report supporting the decision, which are available for public inspection at the Commission's Public Document Room (PDR), located at One White Flint North, Public File Area 01 F21, 11555 Rockville Pike (first floor), Rockville, Maryland, and accessible, electronically, from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room, on the Internet, at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>.
