

existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Manufacturers or importers of passenger cars, motorcycles, light trucks, heavy duty truck engines, non-road vehicles or engines, and evaporative emissions components required to receive a certificate of conformity from EPA prior to selling or introducing these products into commerce in the U.S.

Estimated Number of Respondents: 495.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 1,207.

Estimated Total Annual Cost: \$100,577, including \$19,739 for maintenance or operational costs.

Changes in the Estimates: There is an increase of 512 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This cost estimate makes the same cost assumptions as the previous renewal. The increase is due entirely to the increase in the number of forms received, based on actual counts of fee forms received.

What information is EPA particularly interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the

use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What should I consider when I prepare my comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Offer alternative ways to improve the collection activity.
6. Make sure to submit your comments by the deadline identified under **DATES**.
7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What information collection activity or ICR does this apply to?

Affected entities: Entities potentially affected by this action are NPDES permitted facilities.

Title: Performance Evaluation Studies on Wastewater Laboratories (Renewal)
ICR numbers: EPA ICR No. 0234.10, OMB Control No. 2080-0021.

ICR status: This ICR is currently scheduled to expire on December 31, 2010. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Discharge Monitoring Report-Quality Assurance (DMR-QA)

participation is mandatory for major and selected minor permit holders under the Clean Water Act's National Pollution Discharge Elimination System (NPDES), Section 308. The DMR-QA study is designed to evaluate the analytic ability of the laboratories that perform chemical, microbiological and whole effluent toxicity (WET) analyses required in the NPDES permits for reporting results in the Discharge Monitoring Reports (DMR). Under DMR-QA, the permit holder is responsible: For having their in-house and/or contract laboratories perform proficiency test samples and submit results for grading by proficiency testing (PT) providers. Graded results are transmitted by either the permittee or PT provider to the appropriate Federal or State NPDES regulatory authority. Permit holders are responsible for submitting corrective action reports to the appropriate regulatory authority.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 6.3 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 6,589.

Frequency of response: Annual.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 41,511 hours.

Estimated total annual costs: \$2,461,426. This includes an estimated burden cost of \$1,209,516 and an estimated cost of \$1,251,910 for capital investment or maintenance and operational costs. The number of affected facilities is 6,589.

Are there changes in the estimates from the last approval?

There is a decrease of 5,840 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects EPA's granting a waiver for four States to use their laboratory certification program as a substitute for the DMR-QA program. This resulted in a reduction in the average number of participants from 7,516 to 6,589. The maintenance and operational cost has increased by \$11,770 due to increased costs for obtaining proficiency testing samples. Labor costs have also been adjusted for inflation.

What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact Patrick Yellin.

Dated: June 2, 2010.

Al Havinga,

Acting Director, Agriculture Division.
