

48 training plans will be submitted to the Coal Mine Safety and Health District Manager for the area in which the mine is located. The proposed training will include the following elements: (a) Training in mining methods and operating procedures that will protect the trailing cables against damage; (b) training in the proper procedures for examining the trailing cables to ensure the cables are in a safe operating condition; (c) training in hazards of setting the instantaneous circuit breakers too high to adequately protect the trailing cables; (d) training in how to verify the circuit interrupting device(s) protecting the trailing cable(s) are properly set and maintained. The petitioner further states that the procedures of 30 CFR 48.3 for approval of proposed revisions to already approved training plans will apply. The petitioner asserts that the proposed alternative method will at all times guarantee no less than the same measure of protection to all miners than is provided by the existing standard.

Docket Numbers: M-2010-002-M.

Petitioner: Solvay Chemicals, Inc., P.O. Box 1167, 400 County Road 85, Green River, Wyoming 82935.

Mine: Solvay Chemicals, Inc., Trona Underground Mine, MSHA I.D. No. 48-01295, located in Sweetwater County, Wyoming.

Regulation Affected: 30 CFR 57.22305 (Approved equipment (III mines)).

Modification Request: The petitioner requests a modification of the existing standard to permit the use of certain non-permissible equipment for the purpose of thermographic measurements in or beyond the last open crosscut. The petitioner proposes to use an infrared camera for the purpose of preventative maintenance under specific conditions and while continuously monitoring for methane levels. Immediately prior to the use of the non-permissible equipment, the mine atmosphere will be tested for methane within 6 inches, and would be continuously monitored with an approved instrument capable of providing both visual and audible alarms. Methane levels would be continuously monitored during thermographic measurements by utilizing the longwall continuous methane monitors located at the shear, headgate and tailgate. The continuous monitors alarm at 1% methane and de-energize the longwall mining machine at 1.5% methane. Methane levels will also be monitored by an appropriate continuous monitoring meter carried by the operator. The petitioner asserts that the proposed alternative method will

guarantee the miners no less than the same measure of protection as would the existing standard.

Dated: June 11, 2010.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510-43-P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Notice of Information Collection

AGENCY: National Aeronautics and Space Administration (NASA), *Notice:* (10-067).

ACTION: Notice of information collection.

SUMMARY: The National Aeronautics and Space Administration, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. 3506(c)(2)(A)).

DATES: All comments should be submitted within 60 calendar days from the date of this publication.

ADDRESSES: All comments should be addressed to Brenda J. Maxwell, Office of the Chief Information Officer, Mail Suite 2S71, National Aeronautics and Space Administration, Washington, DC 20546-0001.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Brenda J. Maxwell, Office of the Chief Information Officer, NASA Headquarters, 300 E Street, SW., Mail Suite 2S71, Washington, DC 20546, (202) 358-4616, brenda.maxwell@nasa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

NASA Langley Research Center has a need to baseline employees' work environment. The intent is to use a valid and reliable survey that can assess employees' (both civil servants and on-site contractors) perceptions of their current work environment. The results of the survey will establish a baseline and provide general themes on areas to focus on in order to enhance creativity and innovation at the Center.

II. Method of Collection

Electronic.

III. Data

Title: The KEYS Creativity and Innovation Survey.

OMB Number: 2700-XXXX.

Type of Review: Regular.

Affected Public: Individuals and households.

Estimated Number of Respondents: 1000.

Estimated Time per Response: 30 minutes.

Estimated Total Annual Burden Hours: 500.

Estimated Total Annual Cost: \$0.

IV. Requests for Comments

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of NASA, including whether the information collected has practical utility; (2) the accuracy of NASA's estimate of the burden (including hours and cost) of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including automated collection techniques or the use of other forms of information technology.

Brenda J. Maxwell,

NASA PRA Clearance Officer.
