SUPPLEMENTARY INFORMATION:

A. Background

This interim rule implements section 828 of the National Defense Authorization Act for Fiscal Year 2008 (Pub. L. 110-181). It amends DFARS parts 217 and 241 to authorize the Department of Defense to enter into a contract for a period not to exceed 10 years for the purchase of electricity from sources of renewable energy, as that

term is defined in section 203(b)(2) of the Energy Policy Act of 2005 (42 U.S.C. 15852(b)(2)). DoD may exercise this authority to enter into a contract for a period in excess of five years only if the head of the contracting activity determines, on the basis of a business case analysis prepared by DoD, that—

(1) The proposed purchase of electricity under such contract is cost effective; and

(2) It would not be possible to purchase electricity from the source in an economical manner without the use of a contract for a period in excess of five years.

This rule was subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

DoD has prepared an initial regulatory flexibility analysis consistent with 5 U.S.C. 604. The analysis is summarized below and a copy may be obtained from the point of contact specified herein. There are a very limited number of small businesses engaged in the sale of energy-related services to include the sale of renewable energy. Those small businesses that engage in energy-related activities tend to have more than one area of competency, such as fossil fuel electric power, distribution of electric power, or other electric power generation, etc. With the potential overlap of competencies, it is very likely that a small business may have more than one of these competencies, thereby reducing the number of small businesses in these areas. The market for renewable fuels is highly volatile and does not have the predictability as compared to other fuel markets. Renewable energy and alternative fuel projects are capital-intensive investments, and involve the construction of production facilities which provides limitations to small entities. At this time, DoD is unable to estimate the number of small entities to which this rule will apply. DoD invites comments from small business concerns and other interested parties on the expected impact of this rule on small entities.

DoD will also consider comments from small entities concerning the existing regulations in subparts affected by this rule in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 610 (DFARS Case 2008-D006) in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96-511) does not apply because the
