available at: <http://www.epa.gov/safewater/ndwac/#current>.

SUPPLEMENTARY INFORMATION:

Agenda: At previous meetings, the CRWU Working Group drafted key findings on the water sector and climate change, an adaptive response framework that describes actions that CRWU would undertake, and enabling environment recommendations for activities needed to create a supportive environment in which a utility can take steps to be climate ready. In this meeting, the Working Group will focus on tools, training, and resources needed to support water utilities, ways to integrate CRWU efforts with existing programs, and mechanisms to facilitate the adoption of climate change adaptation and mitigation strategies.

Public Participation: There will be an opportunity for public comment during the CRWU Working Group meeting. Oral statements will be limited to five (5) minutes, and it is preferred that only one person present the statement on behalf of a group or organization. Background: The Agency's *National Water Program Strategy: Response to Climate Change* (2008) identified the need to provide drinking water and wastewater utilities with easy-to-use resources to assess the risk associated with climate change and to identify potential adaptation strategies. The NDWAC, established under the Safe Drinking Water Act, as amended (42 U.S.C. 300f *et seq.*), provides practical and independent advice, consultation and recommendations to the Agency on the activities, functions and policies related to the implementation of the Safe Drinking Water Act. On May 28, 2009, the NDWAC voted on and approved the formation of the CRWU Working Group. EPA anticipates that the Working Group will have five face-

to-face meetings between December 2009 and September 2010 in addition to conference calls and/or video conferencing on an as needed basis. To date, there have been three face-to-face meetings. After the Working Group completes its charge, it will make recommendations to the full NDWAC. The NDWAC will consider these recommendations and make its own recommendations to the EPA.

Working Group Charge: The charge for the CRWU Working Group is to evaluate the concept of "Climate Ready Water Utilities" and provide recommendations to the full NDWAC on the development of an effective program for drinking water and wastewater utilities, including recommendations to: (1) Define and develop a baseline understanding of how to use available information to develop climate change adaptation and mitigation strategies, including ways to integrate this information into existing complementary programs such as the Effective Utility Management and Climate Ready Estuaries Program; (2) Identify climate change-related tools, training, and products that address short-term and long-term needs of water and wastewater utility managers, decisionmakers, and engineers, including ways to integrate these tools and training into existing programs; and (3) Incorporate mechanisms to provide recognition or incentives that facilitate broad adoption of climate change adaptation and mitigation strategies by the water sector into existing EPA Office of Water recognition and awards programs or new recognition programs.
