

public teleconference may contact Ms. Stephanie Sanzone, Designated Federal Officer (DFO), via telephone at (202) 343-9697 or e-mail at sanzone.stephanie@epa.gov. General information about the Council can be found on the EPA Web site at <http://www.epa.gov/advisorycouncilcaa>.

SUPPLEMENTARY INFORMATION: Pursuant to the Federal Advisory Committee Act (FACA), 5 U.S.C., App. 2, notice is hereby given that the Air Quality Modeling Subcommittee (AQMS) of the Advisory Council on Clean Air Compliance Analysis (Council) will hold a public teleconference to discuss additional information on estimates of fine particulate matter (PM_{2.5}) emissions and air quality changes for the Second Section 812 Benefit-Cost Analysis of the Clean Air Act. The Council was established in 1991 pursuant to the Clean Air Act (CAA) Amendments of 1990 (see 42 U.S.C. 7612) to provide advice, information and recommendations on technical and economic aspects of analyses and reports EPA prepares on the impacts of the CAA on the public health, economy, and environment of the United States. The Council is a Federal Advisory Committee chartered under FACA. The AQMS will provide advice through the Council and will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies.

Background: Pursuant to Section 812 of the 1990 Clean Air Act Amendments (CAAA), EPA conducts periodic studies to assess benefits and costs of programs implemented pursuant to the Clean Air Act. The Council has provided advice on an EPA retrospective study published in 1997 and an EPA prospective study completed in 1999. EPA initiated a second prospective study to evaluate the benefits and costs of EPA Clean Air programs for years 1990–2020. The Council has previously provided advice on the analytical blueprint for this study. EPA's Office of Air and Radiation (OAR) is now nearing completion of the analytical work for the second prospective study. The AQMS met on February 19, 2010 [Federal Register Notice dated January 26, 2010 (75 FR 4070–4071)] to review technical documents pertaining to modeling of air quality for seven emissions scenarios: a 1990 baseline simulation; and simulations for 2000, 2010 and 2020 with and without the CAAA. The AQMS held a follow-up teleconference meeting on March 15, 2010 to discuss information provided by EPA on proposed adjustments to estimated emissions of primary PM_{2.5} from particular sources and the effects

on the estimated air quality changes between scenarios based on those revised emissions estimates. Materials for the February 19 and March 15 meetings are available on the Council Web site at http://yosemite.epa.gov/sab/sabproduct.nsf/fedrgstr_activites/2nd%20Prospective%20812%20-%20AQMS?OpenDocument.

In a resulting advisory report (EPA-COUNCIL-10-002), the AQMS recommended that “the scaling procedure [for PM_{2.5}] should be clearly documented in the draft modeling report * * * or in a separate document that also describes the MATS [Modeled Attainment Test Software] adjustment procedure and results, including the results of MATS with and without scaling of emissions.” In response to this recommendation, the EPA has provided a memorandum (dated June 14, 2010) that documents the adjustment procedure and PM_{2.5} results for a number of metropolitan areas. The purpose of the August 11, 2010 teleconference meeting is to discuss the MATS memorandum and provide final advice to the Council and the Agency on the reasonableness of the primary PM_{2.5} emissions revisions and the resulting re-estimated air quality concentration changes between scenarios that will be used for benefit estimation in the Second Section 812 Prospective Study.

Technical Contacts: The Office of Air and Radiation technical contact for the Second Section 812 Benefit-Cost Analysis of the Clean Air Act is Mr. Jim DeMocker at (202) 564-1673 or democker.jim@epa.gov.

Availability of Meeting Materials: The meeting materials, including the review materials and meeting agenda for the August 2010 teleconference, will be posted to the Council Web site at <http://www.epa.gov/advisorycouncilcaa> prior to the meeting. EPA draft documents provided to the AQMS also are available at <http://www.epa.gov/oar/sect812/prospective2.html>.

Procedures for Providing Public Input: Interested members of the public may submit relevant written or oral information for the AQMS to consider on the topics of this advisory activity. **Oral Statements:** In general, individuals or groups requesting an oral presentation at a teleconference meeting will be limited to three minutes per speaker, with no more than a total of one hour for all speakers. Interested parties should contact Ms. Sanzone at the contact information provided above by August 4, 2010, to be placed on the public speaker list for the August 11, 2010 meeting. **Written Statements:** Written statements should be received in the SAB Staff Office by August 4,

2010, so that the information can be made available to the AQMS for their consideration prior to the meeting. Written statements should be supplied to Ms. Sanzone in the following formats: one hard copy with original signature and one electronic copy via e-mail (acceptable file format: Adobe Acrobat PDF, MS Word, WordPerfect, MS PowerPoint, or Rich Text files). Submitters are asked to provide electronic versions of each document submitted with and without signatures, because the SAB Staff Office does not publish documents with signatures on its Web sites.

Accessibility: For information on access or services for individuals with disabilities, please contact Ms. Sanzone at (202) 343-9697, or via e-mail at sanzone.stephanie@epa.gov, preferably at least ten (10) days prior to the meeting, to give EPA as much time as possible to process your request.

Dated: June 23, 2010.

Vanessa T. Vu,
Director, EPA Science Advisory Board Staff Office.

II. Contractor Requirements

Under this contract number, the contractor will perform the following:

Under Contract No. EP10H001452, the contractor shall review and/or update approximately 280 Data Evaluation Records (DERs) per contract period to address the evaluation of endocrine-related effects cited in the Other Scientifically Relevant Information (OSRI). The contractor shall retrieve some or all of an estimated 6,000 journal articles cited in the OSRI that provide information on the endocrine disruption potential of the chemicals under consideration.

The Test Order Recipients may submit journal articles that will require review of published mammalian literature submitted as OSRI. Journal articles may be submitted for nine Tier 1 Assays. It is estimated that the submission may include up to 10 articles/assays x 9 per chemical x 67 chemicals for a total of 6,000 journals articles.

The contractor shall review some or all of the journal articles retrieved and prepare a Journal Article Review summary (JARs) containing the parameters/endpoints evaluated in the studies.

The contractor shall perform expert analyses of difficult and complex toxicological issues as defined in written technical direction from the Contracting Officer Representative (COR).
