

Vehicles, and tactical missiles such as the Patriot and Theater High Altitude Area Defense (THAAD). A number of smaller target and interceptor missile systems may also be flown from KLC. The AAC anticipates ability to accommodate nine launches per year.

Marine mammals, specifically pinnipeds hauled out on Ugak Rock, which lies immediately south of Narrow Cape, would be subjected to rocket launch noise. Sound monitoring previously conducted on Ugak Rock demonstrates that noise levels could reach up to 101.4 dBA for the loudest vehicle, the Castor 120. AAC is requesting the take of 10 Steller sea lions per launch and the take of 125 harbor seals per launch.

#### Information Solicited

Interested persons may submit information, suggestions, and comments concerning the AAC's request (see **ADDRESSES**). All information, suggestions, and comments related to the AAC's request and NMFS' potential development and implementation of regulations governing the incidental taking of marine mammals by the AAC near the KLC will be considered by NMFS in developing, if appropriate, regulations governing the issuance of letters of authorization.
