The Commission is requesting an extension (no change in the reporting requirement). The Commission has reduced the total annual burden for this collection by 1,085 hours due to 21,700 fewer respondents.

As part of the Commission's Broadband Plan, the FCC has created the Spectrum Dashboard, a database of the frequency bands from 225 MHz – 3.7 GHz available for non-federal uses, including for broadband deployment across the nation. The Spectrum Dashboard also makes information transparent and readily available to interested stakeholders (e.g., service providers, manufacturers, innovators, investors, etc.) to better enable them to gain access to spectrum and to help them assist the Commission in our spectrum policy decisions. The increased accessibility to spectrum and licensing information made possible by the Spectrum Dashboard is particularly valuable at this time as multiple stakeholders search for ways to participate in the deployment of wireless broadband throughout the nation.

The purpose of this collection is to enable individuals and others to voluntarily provide feedback on their experience with the Spectrum Dashboard. This collection will provide the Commission with unique data on how stakeholders are using the Spectrum Dashboard database and what improvements or enhancements they would like to see in future versions of the Spectrum Dashboard.

Federal Communications Commission.

Secretary,
Office of the Secretary,
Office of Managing Director.
