Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-5960 or send an e-mail to omb@cdc.gov. Send written comments to CDC Desk Officer, Office of

Management and Budget, Washington, DC 20503 or by fax to (202) 395-5806. Written comments should be received within 30 days of this notice.

Proposed Project

National Public Health Performance Standards Program Local Public Health System Assessment (OMB 0920-0555 exp. 8/31/10)—Extension—Office of State, Tribal, Local and Territorial Support, Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Office of State, Tribal, Local and Territorial Support is proposing to extend the formal, voluntary data collection that assesses the capacity of local public health systems to deliver the essential services of public health. Local health departments will respond to the survey on behalf of the collective body of representatives from the local public health system. Electronic data submission will be used when local public health agencies complete the public health assessment.

A three-year approval is being sought with the current data collection instrument. The data collection instrument has been valuable in assessing performance and capacity and identifying areas for improvement.

From 1998-2002, the National Public Health Performance Standards Program convened workgroups with the National Association of County and City Health Officials (NACCHO), The Association of State and Territorial Health Officials (ASTHO), the National Association of Local Boards of Health (NALBOH), the American Public Health Association (APHA), and the Public Health Foundation (PHF) to develop performance standards for public health systems based on the essential services of public health. In 2005, CDC reconvened workgroups with these same organizations to revise the data collection instruments, in order to ensure the standards remain current and improve user friendliness. There is no cost to the respondent, other than their time. The estimated annualized burden hours are 5600.

ESTIMATE OF ANNUALIZED BURDEN HOURS

Type of respondents	Form name	No. of respondents	No. of responses per respondent	Average burden per response (in hours)
Local Public Health System	Local Public Health System Performance Assessment Instrument.	350	1	16

Dated: July 9, 2010.
Thelma Sims,
Acting Reports Clearance Officer, Centers for Disease Control and Prevention.

Proposed Project

Monitoring and Reporting System for Chronic Disease Prevention and Control Programs—New—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Although chronic diseases are among the most common and costly health problems, they are also among the most preventable. The Centers for Disease Control and Prevention (CDC) works with states, territories, tribal organizations, and the District of Columbia (collectively referred to as “state-based” programs) to develop, implement, manage, and evaluate chronic disease prevention and control programs. Support and guidance for these programs have been provided through cooperative agreement funding and technical assistance, administered

by CDC’s National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP). Partnerships and collaboration with other Federal agencies, nongovernmental organizations, local communities, public and private sector organizations, and major voluntary associations have been critical to the success of these efforts.

CDC seeks OMB approval for three years to collect progress and activity information from health departments funded for four program areas: Tobacco control, diabetes prevention and control, Healthy Communities, and state-based behavioral risk factor surveillance. Information will be collected electronically through a new, electronic Management Information System (MIS). Information will be collected on each program area’s objectives, planning activities, resources, partnerships, policy and environmental strategies for preventing or controlling chronic diseases, and progress toward meeting goals. The new MIS harmonizes the progress reporting framework for all program areas and
