(ii) Net removals of cheese for a period of 12 consecutive months exceed 400,000,000 pounds, in which case the CCC block cheese purchase price will be not less than \$0.93 per pound during the immediately following month;

(2) Cheddar cheese in barrels for \$0.03 per pound less than the cheddar cheese block price;

(3) Butter for not less than \$1.05 per pound; unless

(i) Net removals of butter for a period of 12 consecutive months exceed 450,000,000 pounds, but do not exceed 650,000,000 pounds, in which case the

CCC butter purchase price will be not less than \$0.95 per pound during the immediately following month, or

(ii) Net removals of butter for a period of 12 consecutive months exceed 650,000,000 pounds, in which case the CCC butter purchase price will be not less than \$0.85 per pound during the immediately following month; and

(4) Nonfat dry milk for not less than \$0.80 per pound, unless

(i) Net removals of nonfat dry milk for a period of 12 consecutive months exceed 600,000,000 pounds, but do not exceed 800,000,000 pounds, in which case the CCC nonfat dry milk purchase price will be not less than \$0.75 per pound during the immediately following month, or,

(ii) Net removals of nonfat dry milk for a period of 12 consecutive months exceed 800,000,000 pounds, in which case the CCC nonfat dry milk purchase price will be not less than \$0.70 per pound during the immediately following month.

(b) CCC may offer to purchase cheddar cheese, butter, fortified nonfat dry milk, or fortified instant nonfat dry milk in consumer-sized ready-to-consume packages at a premium to the purchase prices for cheddar cheese, butter and nonfat dry milk specified in paragraph (a) of this section. Any such offers will be made through CCC's purchase announcements, and such offers may be limited by quantity and to a specific time period.

(c) CCC may offer to purchase cheddar cheese with a lower moisture content than is specified in § 1430.102(c) at a premium to the prices specified in paragraph (a) of this section. Any such offers will be made through CCC's purchase announcements, and such offers may be limited by quantity and to a specific time period.

§ 1430.104 Sales from inventories.

(a) CCC may sell any dairy product purchased as specified in this subpart for unrestricted use at the market price prevailing for that product at the time of sale, except that the sale price will not be less than 110 percent of the purchase price specified in § 1430.103(a), before any price reduction for the amount of CCC net removals of the dairy products.

Specifically, 10 CFR part 9, section 9.37(a) will be changed from GG-7/7 to GG-7/6 and 9.37(c) will be changed from ES-4 to ES-Maximum.

Environmental Impact: Categorical Exclusion

The NRC has determined that this final rule is the type of action described in categorical exclusion 10 CFR 51.22(c)(2). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this rule.

Paperwork Reduction Act Statement

This final rule does not contain information collection requirements and, therefore, is not subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Public Protection Notification

The NRC may not conduct or sponsor, and a person is not required to respond to, a request for information or an information collection requirement unless the requesting document displays a currently valid OMB control number.

Backfit Analysis

The NRC has determined that the backfit rule does not apply to this final rule; therefore, a backfit analysis is not required for this final rule because these amendments are administrative in nature and do not involve any provisions that would impose backfits as defined in 10 CFR chapter I.

Congressional Review Act

In accordance with the Congressional Review Act of 1996, the NRC has determined that this action is not a major rule and has verified this determination with the Office of Information and Regulatory Affairs of OMB.

List of Approved Spent Fuel Storage Casks: NUHOMS® HD Revision 1; Withdrawal

AGENCY: Nuclear Regulatory Commission.

ACTION: Direct final rule; withdrawal.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is withdrawing a direct final rule that would have revised the NUHOMS® HD cask system listing

within the list of approved spent fuel storage casks to include Amendment No. 1 to Certificate of Compliance (CoC) Number 1030. The NRC is taking this action because the applicant identified that a certain Technical Specification (TS) for Boral characterization was not written precisely and in a manner that could be readily and demonstrably implemented. Specifically, the requirements for meeting TS 4.3.1, "Neutron Absorber Tests," which references Section 9.1.7.3 of the Safety Analysis Report (SAR), are not precisely quantified in that it requires that "the average size of the boron carbide particles in the finished product is approximately 50 microns after rolling." Use of language such as "average" and "approximately" is imprecise, and no ranges or statistical variations are specified. The NRC will publish a revised direct final rule along with its companion proposed rule after the necessary revisions to the TS are made.

DATES: The direct final rule published May 6, 2010 (75 FR 24786), is withdrawn.

SUPPLEMENTARY INFORMATION: On May 6, 2010 (75 FR 24786), the NRC published in the **Federal Register** a direct final rule that would have amended its regulations in 10 CFR 72.214 to revise the NUHOMS® HD System listing within the "List of Approved Spent Fuel Storage Casks" to include Amendment No. 1 to the CoC. Amendment No. 1 would have modified the present cask system by adding Combustion Engineering 16x16 class fuel assemblies as authorized contents, reducing the minimum off-normal ambient temperature from -20 °F to -21 °F, expanding the authorized contents of the NUHOMS® HD System to include pressurized water reactor fuel assemblies with control components, reducing the minimum initial enrichment of fuel assemblies from 1.5 weight percent uranium-235 to 0.2 weight percent uranium-235, clarifying the requirements of reconstituted fuel assemblies, adding requirements to qualify metal matrix composite neutron absorbers with integral aluminum cladding, deleting use of nitrogen for draining the water from the dry shielded canister (DSC) and allowing only helium as a cover gas during DSC cavity water removal operations, and making
