SUPPLEMENTARY INFORMATION: Under section 108(a) of the Clean Air Act (CAA), the Administrator identifies and lists certain pollutants which “cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare.” The EPA then issues air quality criteria for these listed pollutants, which are commonly referred to as “criteria pollutants.” The air quality criteria are to “accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air, in varying quantities.” Under section 109 of the CAA, EPA establishes primary (health-based) and secondary (welfare-based) national ambient air quality standards (NAAQS) for pollutants for which air quality criteria are issued. Section 109(d) of the CAA requires periodic review and, if appropriate, revision of existing air quality criteria. The revised air quality criteria reflect advances in scientific knowledge on the effects of the pollutant on public health or welfare. The EPA is also required to periodically review and revise the NAAQS, if appropriate, based on the revised criteria.¹

As part of EPA’s review of the primary (health-based) and secondary (welfare-based) PM NAAQS, the Agency recently released the *Policy Assessment for the Review of the Particulate Matter National Ambient Air Quality Standards—Second External Review Draft*² (Policy Assessment; 75 FR 39253; July 8, 2010). The second draft Policy

Assessment builds on the scientific and technical information available in this review as assessed in the *Integrated Science Assessment for Particulate Matter*³ and two quantitative assessment documents, *Particulate Matter Urban-Focused Visibility Assessment (UFVA)* and *Quantitative Health Risk Assessment for Particulate Matter*.⁴

The UFVA was scheduled to be finalized on or about June 30, 2010 (75 FR 39252, July 8, 2010). However, in finalizing this document, EPA staff identified a data processing error which caused organic carbonaceous material to be over estimated on some days. The corrections were quite small and did not affect the conclusions. Corrections have been made to the final UFVA. Since the UFVA was finalized later than originally anticipated and chapter 4 of the second draft Policy Assessment (Review of the Secondary Standards for Visibility-Related Effects) builds on the information presented in the UFVA, EPA is extending the comment period by two weeks for this chapter to provide stakeholders and the public with adequate time to conduct appropriate analysis and prepare meaningful comments. The second draft Policy Assessment may be accessed online through EPA’s TTN website at: http://www.epa.gov/ttn/naaqs/standards/pm/s_pm_2007_pa.html.

The draft document described above does not represent and should not be construed to represent any final EPA policy, viewpoint, or determination.

Dated: July 22, 2010.

Jennifer Noonan Edmonds,
Acting Director, Office of Air Quality Planning and Standards.
