SUPPLEMENTARY INFORMATION:**Title:** Phytophthora Ramorum; Quarantine and Regulations.**OMB Number:** 0579-0310.**Type of Request:** Extension of approval of an information collection.**Abstract:** The Plant Protection Act (7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture, either independently or in cooperation with States, to carry out operations or measures to detect, eradicate, suppress, control, prevent, or retard the spread of plant pests that are new to or not widely distributed within the United States.In accordance with the regulations in "Subpart—Phytophthora Ramorum" (§§ 301.92 through 301.92-12), the Animal and Plant Health Inspection Service of the U.S. Department of Agriculture restricts the interstate movement of certain articles to prevent the spread of *Phytophthora ramorum*, the plant pathogen that causes the disease commonly known as sudden oak death. The regulations contain requirements for the interstate movement of regulated articles, such as nursery stock and certain trees, from both quarantined and nonquarantined areas and involve information collection activities, including certificates, compliance agreements, and recordkeeping.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- (3) Enhance the quality, utility, and clarity of the information to be collected; and

- (4) Minimize the burden of the collection of information on those who are to respond, through use, as

appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.3131 hours per response.**Respondents:** Nurseries in California, Oregon, and Washington.**Estimated annual number of respondents:** 1,427.**Estimated annual number of responses per respondent:** 5.0644709.**Estimated annual number of responses:** 7,227.**Estimated total annual burden on respondents:** 2,263 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 27th day of July 2010.

Kevin Shea,*Acting Administrator, Animal and Plant Health Inspection Service.*

BILLING CODE P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: 2010 Census Coverage Measurement Final Housing Unit Followup Operation.

Form Number(s): D-1340, D-1340(PR), D-1325, D-1325(PR).

OMB Control Number: None.

Type of Request: New collection.

Burden Hours: 3,034.

Number of Respondents: 57,969.

Average Hours Per Response: 3 minutes.

Needs and Uses: The U.S. Census Bureau requests authorization from the Office of Management and Budget to conduct the Census Coverage Measurement (CCM) Final Housing Unit Followup (FHUFU) and Final Housing Unit Followup Quality Control (FHUFU QC) Operations as part of the 2010 Census. The CCM program will provide estimates of *net coverage error* and *components of census coverage* (including omissions and erroneous enumerations) for housing units and persons in housing units. The data collection and matching methodologies for previous coverage measurement programs were designed only to measure *net coverage error*, the difference between the estimate of the true population count and the actual census count.

The 2010 CCM will be composed of two samples selected to measure census coverage of housing units and the household population: the population sample (P sample) and the enumeration sample (E sample). The primary sampling unit is a block cluster, which consists of one or more contiguous census blocks. The P sample is a sample of housing units and persons obtained independently from the census for a sample of block clusters. The E sample is a sample of census housing units and enumerations in the same block of clusters as the P sample.

The paper FHUFU form will be used to collect additional address information for addresses selected for followup. The CCM FHUFU operation attempts to collect additional information that might allow a resolution of match/nonmatched codes for addresses in the CCM address list and the census address list, including whether occupied or vacant on Census Day (April 1, 2010) and also to resolve potential duplicates of the two lists.

A quality control operation, FHUFU QC, will also be conducted on 55 percent of the FHUFU cases. The purpose of the operation is to ensure the work performed is of acceptable quality.

In addition to the CCM FHUFU and FHUFU QC Operations, the Evaluation of AFAQ will be conducted, as part of the 2010 Census Program for Evaluations and Experiments (CPEX). The purpose of this evaluation is to evaluate the accuracy of the Master Address File (MAF) after the completion

of all Census operations, including the 2010 Address Canvassing operation. While the majority of the Evaluation of AFAQ will rely heavily on the results of CCM, two additional small field operations are required.

The first field operation scheduled for the Evaluation of AFAQ will provide information on the accuracy of the delete and duplicate actions applied to living quarters in the 2010 Address Canvassing operation. Clerical matchers will attempt to match the living quarters with a delete or duplicate action to the living quarters found in the CCM operation and unresolved cases will be sent to the field for followup. Enumerators will only follow up on cases where the status of the living quarters is in question, to determine the true status.

The second field operation of the Evaluation of AFAQ will provide information on the accuracy of the geocodes in the 2010 Census. Clerical matchers will attempt to identify addresses coded by CCM as "missing" from the census, by searching outside the CCM sample block cluster. Enumerators will follow up on any unresolved cases, and also any cases where census units were listed in the wrong block within a CCM sample cluster.

Affected Public: Individuals or households.

Frequency: One time.

Respondent's Obligation: The CCM operation is mandatory. The AFAQ evaluation is voluntary.

Legal Authority: Title 13 U.S.C., Sections 141 and 193.

OMB Desk Officer: Brian Harris-Kojetin, (202) 395-7314.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482-0266, Department of Commerce, Room 6616, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at dhynek@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Brian Harris-Kojetin, OMB Desk Officer either by fax (202-395-7245) or e-mail (bharrisk@omb.eop.gov).

Dated: July 27, 2010.

Management Analyst, Office of the Chief Information Officer.
