*Description:* The Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA) provides that under certain circumstances participants and beneficiaries of group health plans that satisfy the definition of “qualified beneficiaries” under COBRA may elect to continue group health coverage temporarily following events known as “qualifying events” that would otherwise result in loss of coverage. COBRA provides that the Secretary of Labor (the Secretary) has the authority under section 608 of the Employee Retirement Income Security Act of 1974 (ERISA) to carry out the provisions of Part 6 of title I of ERISA. The Conference Report that accompanied COBRA authorized the Secretary to issue regulations implementing the notice and disclosure requirements of COBRA.

Under the regulatory guidelines, plan administrators are required to distribute notices as follows: a general notice to be distributed to all participants in group health plans subject to COBRA; an employer notice that must be completed by the employer upon the occurrence of a qualifying event; a notice and election form to be sent to a participant upon the occurrence of a qualifying event that

might cause the participant to lose group health coverage; an employee notice that may be completed by a qualified beneficiary upon the occurrence of certain qualifying events such as divorce or disability; and, two other notices, one of early termination and the other a notice of unavailability. Also included in the ICR are two model notices that the Department believes will help reduce costs for service providers in preparing and delivering notices to comply with the regulations. For additional information, see related notice published in the **Federal Register** on April 2, 2010 (Vol. 75 page 16841).

MD 8.11, "Review Process for 10 CFR 2.206 Petitions," is a guidance document that details the internal procedures for NRC staff review and disposition of petitions submitted under Title 10 of the Code of Federal Regulations (10 CFR) 2.206. Because some of these internal procedures directly impact the interaction between members of the public and the NRC, the NRC is soliciting comments from the public, on what, if any, revisions should be made to the agency's internal process as described in MD 8.11. The 10 CFR 2.206 process is the primary mechanism for a member of the public to request Commission review of a potential safety problem with an NRC licensed facility, outside of a licensing or rulemaking proceeding. Any person may file a petition under 10 CFR 2.206 to request that the Commission modify, suspend, or revoke a license, or take any other enforcement-related action that may be proper. This process provides the public with a mechanism to raise issues of concern to the Commission. Each 10 CFR 2.206 petition is reviewed by the
