On March 11, 2010, the Commission adopted an Order, Amendment of the Amateur Service Rules to Facilitate Use of Spread Spectrum Communications Technologies, WT Docket No. 10-62, FCC 10-38. This proceeding moved transmitter power limit information that applies to stations transmitting a spread spectrum emission from 47 CFR 97.303(s) to 47 CFR 97.313(i), Transmitter Power Standards. No station may transmit with an effective radiated power (ERP) exceeding 50 W PEP on the 60 m band. For the purpose of computing ERP, the transmitter PEP will be multiplied by the antenna gain relative to a dipole or the equivalent calculation in decibels. A half-wave dipole antenna will be presumed to have a gain of 1. Licensees using other antennas must maintain in their station records either the manufacturer data on the antenna gain or calculations of the antenna gain.

The information is used to establish a record of amateur operations, so that if interference to critical power line carrier systems occurs, the Commission can respond quickly to locate the source.

Federal Communications Commission.

Secretary,
