Approval and Promulgation of Air Quality Implementation Plans; MN**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Proposed rule.

SUMMARY: EPA is proposing to approve Minnesota's request to amend its State Implementation Plan (SIP) for sulfur dioxide (SO₂). The Minnesota Pollution Control Agency submitted the SIP revision request to EPA on November 23, 2009, and supplemented it on March 3, 2010. The approval of this request would revise SIP requirements applicable to Saint Mary's Hospital, located in Rochester, Minnesota by adding a 2500 kilowatt (KW) reciprocating internal combustion engine (RICE) electric generator and reducing the allowable diesel fuel sulfur content for two existing RICE electric generators. The revision also includes administrative changes in the identification of emissions units. These revisions are included in a joint Title I/ Title V document for Saint Mary's Hospital, which would replace the document currently approved into the SIP for the facility. These revisions will result in reducing the SO₂ impact in the Rochester area, and strengthening the existing SO₂ SIP.

If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment.
