Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American Tribes; other interested parties; and local libraries and newspapers. This list also includes all affected landowners (as defined in the Commission's regulations) who are potential right-of-way grantors, whose property may be used temporarily for project purposes, or who own homes within certain distances of aboveground facilities, and anyone who submits comments on the project. We will update the environmental mailing list as the analysis proceeds to ensure that we send the information related to this environmental review to all individuals, organizations, and government entities interested in and/or potentially affected by the planned project.

If the EA is published for distribution, copies will be sent to the environmental mailing list for public review and comment. If you would prefer to receive a paper copy of the document instead of the CD version or would like to remove your name from the mailing list, please return the attached Information Request (appendix 2).

Becoming an Intervenor

Once Sawgrass files its application with the Commission, you may want to become an "intervenor" which is an official party to the Commission's proceeding. Intervenors play a more formal role in the process and are able to file briefs, appear at hearings, and be heard by the courts if they choose to appeal the Commission's final ruling. An intervenor formally participates in the proceeding by filing a request to intervene. Instructions for becoming an intervenor are included in the User's Guide under the "e-filing" link on the Commission's Web site. Please note that the Commission will not accept requests for intervenor status at this time. You must wait until a formal application for the project is filed with the Commission.

August 3, 2010.

By order dated July 26, 2010, in Docket No. ER10-1401-000, the Federal

Energy Regulatory Commission (Commission) directed staff to convene a technical conference regarding California Independent System Operator Corporation's (CAISO) proposed Revised Transmission Planning Process (RTPP).¹ Take notice that such conference will be held on August 24, 2010 at the Commission's headquarters at 888 First Street, Washington, DC 20426, beginning at 9 a.m. (EDT) in the Commission Meeting Room. The technical conference will be led by Commission staff. Commissioners may attend the conference.

The purpose of the technical conference is to discuss the issues raised by CAISO's proposed revisions to its Open Access Transmission Tariff (Tariff) to implement its RTPP in Docket No. ER10-1401-000 and obtain additional information regarding CAISO's proposal. Because CAISO's RTPP filing presents issues that may be interrelated with the Petition for Declaratory Order filed by Green Energy Express LLC and 21st Century Transmission Holdings, LLC, in Docket No. EL10-76-000, parties are hereby notified that issues pending in Docket No. EL10-76-000 may be discussed at the technical conference.

CAISO and the parties that choose to participate in the conference should be prepared to address the following topics, among others:

- How the RTPP incorporates participation from all stakeholders, including the California Transmission Planning Group, and complies with the transmission planning principles of Order No. 890;
- How the various categories of transmission projects will be defined and differentiated;
- To what extent non-incumbent transmission developers can sponsor transmission projects identified in the RTPP and become participating transmission owners in the CAISO;
- The selection criteria for projects in the various transmission categories, including which proposals have priority during the evaluation process;
- How projects submitted during the 2008/2009 Request Window will be processed, with respect to both the current Tariff and the proposed RTPP; and
- The integration and coordination of RTPP studies with those done under the Large Generator Interconnection Process, and related assumptions, data, and planning criteria.

A subsequent notice will be issued by the Commission providing an agenda of the conference.
