SUPPLEMENTARY INFORMATION:

Background and Purpose

Section 7001(a) of the Oil Pollution Act of 1990 (OPA 90) established the Interagency Coordinating Committee on Oil Pollution Research. The purpose of the Interagency Committee is twofold: (1) To prepare a comprehensive, coordinated Federal oil pollution

research and development (R&D) plan; and (2) to promote cooperation with industry, universities, research institutions, state governments, and other nations through information sharing, coordinated planning, and joint funding of projects. The Interagency Committee was commissioned with 13 members and is chaired by the Coast Guard. Membership includes:

- National Oceanic and Atmospheric Administration (NOAA)
- National Institute of Standards and Technology (NIST)
- Department of Energy (DOE)
- Bureau of Ocean Energy Management, Regulation, and Enforcement (BOEMRE)—formally known as Minerals Management Service (MMS)
- United States Fish and Wildlife Service (USFWS)
- Maritime Administration (MARAD)
- Pipeline and Hazardous Materials Safety Administration (PHMSA)
- United States Army Corps of Engineers (USACE) —United States Navy (USN)
- Environmental Protection Agency (EPA)
- National Aeronautics and Space Administration (NASA)
- United States Coast Guard (USCG)
- Federal Emergency Management Agency (FEMA), and
- United States Fire Administration (USFA)

Section 7001(b) of the Oil Pollution Act of 1990 required the Interagency Committee to prepare an Oil Pollution Research and Technology Plan. The Interagency Committee prepared the original Oil Pollution Research and Development (R&D) Technology Plan to define the roles of each Federal agency involved in oil spill research and development. The plan was submitted to Congress in April 1992 and later reviewed by the National Research Council's Committee on Oil Spill Research and Development under the auspices of the Marine Board. Using input from the Marine Board, the Committee revised the plan in May 1993 to address spill prevention, human factors, and the field testing/demonstration of developed response technologies. The current version of the plan, still based on Marine Board recommendations, is dated April 1997. The Interagency Committee is coordinating an update of the Technology Plan during the next two fiscal years.

The Committee previously met on May 19, 2010.
