SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. A full benchmark assessment conducted under SEDAR

includes three workshops: (1) Data Workshop, (2) Stock Assessment Workshop Process and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Stock Assessment Workshop is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Review Workshop Report documenting Panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; international experts; and staff of Councils, Commissions, and state and Federal agencies.

SEDAR conducts updates of benchmark stock assessments previously conducted through the SEDAR program. Update assessments add additional data points to datasets incorporated in the original SEDAR benchmark assessment and run the benchmark assessment model to update population estimates.

The greater amberjack update assessment will update the SEDAR 9 benchmark of Gulf of Mexico greater amberjack. The update process consists of a series of webinars.

Greater Amberjack Update Schedule

October 7, 2010; 2 p.m. – 5 p.m.; SEDAR Update Assessment Webinar II

November 22, 2010; 10 a.m. – 1 p.m.; SEDAR Update Assessment Webinar III

Using updated datasets adopted during the Data Webinar, participants will employ assessment models used in SEDAR 9 to evaluate stock status, estimate population benchmarks and management criteria, and project future conditions. Participants will recommend the most appropriate methods and configurations for determining stock status and estimating population parameters.
