Title: Annual Public Water System Compliance Report (Reinstatement).

ICR numbers: EPA ICR No. 1812.04, OMB Control No. 2020-0020.

ICR Status: This is a request to reinstate an ICR that expired on June 30, 2008. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in

certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Section 1414 (c)(3)(A) of the Safe Drinking Water Act requires that each state (a term that includes states, commonwealths and territories) that has primary enforcement authority under the Act shall prepare, make readily available to the public, and submit to the Administrator of EPA, an annual report of violations of national primary drinking water regulations in the state. These Annual State Public Water System Compliance Reports are to include violations of maximum contaminant levels, treatment requirements, variances and exemptions, and monitoring requirements determined to be significant by the Administrator after consultation with the states. To minimize a state's burden in preparing its annual statutorily-required report, EPA issued guidance that explains what Section 1414(c)(3)(A) requires and provides model language and reporting templates. EPA also annually makes available to the states a computer query that generates for each state (from information states are already separately required to submit to EPA's national database on a quarterly basis) the required violations information in a table consistent with the reporting template in EPA's guidance.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 80 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: State, local and/or Tribal Governments

Estimated Number of Respondents: 55.

Frequency of Response: Yearly.

Estimated Total Annual Hour Burden: 4,400.

Estimated Total Annual Cost: \$232,303, includes \$0 annualized capital or O&M costs.

Changes in the Estimates: There is a decrease of 80 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to miscalculating the number of states required to submit reports. Wyoming was counted in the previous ICR as a respondent although it doesn't have primacy for the drinking water program and the US EPA submits its annual report. The number of respondents should be fifty-five entities (49 states, 5 territories and one tribe). The change is an adjustment to the estimates

Dated: August 18, 2010.

Joseph A. Sierra,

Acting Director, Collection Strategies Division.
