

review. In conducting these reviews, we consider the best scientific and commercial data that has become available since the listing determination or most recent status review, such as:

(A) Species biology, including, but not limited to, population trends, distribution, abundance, demographics, and genetics;

(B) Habitat conditions, including, but not limited to, amount, distribution, and suitability;

(C) Conservation measures that have been implemented that benefit the species;

(D) Threat status and trends (*see* five factors under heading “How Do We Determine Whether a Species is Endangered or Threatened?”); and

(E) Other new information, data, or corrections.

#### IV. How do we determine whether a species is endangered or threatened?

Section 4(a)(1) of the Act requires that we determine whether a species is endangered or threatened based on one or more of the five following factors:

(A) The present or threatened destruction, modification, or curtailment of its habitat or range;

(B) Overutilization for commercial, recreational, scientific, or educational purposes;

(C) Disease or predation;

(D) The inadequacy of existing regulatory mechanisms; or

(E) Other natural or manmade factors affecting its continued existence.

Under section 4(b)(1) of the Act, we must base our assessment of these factors solely on the best scientific and commercial data available.

#### V. What could happen as a result of this review?

For each species under review, if we find new information indicating a change in classification is warranted, we may propose a new rule that could do one of the following:

(A) Reclassify the species from endangered to threatened (downlist); or

(B) Remove the species from the List (delist).

If we determine that a change in classification is not warranted, then the species remains on the List under its current status.

#### VI. Request for New Information

To ensure that a 5-year review is complete and based on the best available scientific and commercial information, we request new information from all sources. See “What Information Do We Consider in Our Review?” for specific criteria. If you submit information, please support it

with documentation such as maps, bibliographic references, methods used to gather and analyze the data, and/or copies of any pertinent publications, reports, or letters by knowledgeable sources.

If you wish to provide information for any species included in these 5-year reviews, please submit your comments and materials to the Field Supervisor of the appropriate Fish and Wildlife Office (*see* ADDRESSES section).

#### VII. Public Availability of Comments

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Comments and materials received will be available for public inspection, by appointment, during normal business hours at the offices where the comments are submitted.

#### VIII. Completed and Active Reviews

A list of all completed and currently active 5-year reviews addressing species for which the Pacific Region of the Service has lead responsibility is available at: <http://www.fws.gov/pacific/ecoservices/endangered/recovery/5year.html>.

#### IX. Authority

This document is published under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).
