Description: A number of standards issued by the Occupational Safety and Health Administration (OSHA) contain requirements for equipment, products, or materials. These standards often specify that employers use only equipment, products, or material tested or approved by a nationally recognized testing laboratory (NRTL); this requirement ensures that employers use safe equipment, products, or materials in complying with the standards. Accordingly, OSHA promulgated the regulation titled "Definition and Requirements for a Nationally Recognized Testing Laboratory" (the

Regulation). The Regulation specifies procedures that organizations must follow to apply for, and to maintain, OSHA's recognition to test and certify equipment, products, or material for this purpose.
