

Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps are identified as a Special Flood Hazard Area (SFHA). SFHA is defined as the area that will be inundated by the flood event having a one percent chance of being equaled or exceeded in any given year. The one percent annual chance flood is also referred to as the base flood or 100-year flood. According to FEMA Flood Insurance Rate Map 06077c07457, the majority of the Intertie study area is located within Zone X with a small portion located within Zone AE. There are no practical means of avoiding floodplain areas. Implementation of environmental commitments and mandatory compliance with applicable floodplain management standards as set forth by FEMA will ensure the Intertie does not substantially alter the normal drainage patterns, affect runoff rates, or contribute to the impedance of flood flows.

The Intertie study area contains Seasonal, Emergent marsh, Alkali wetlands, and Perennial, Intermittent, and Ephemeral drainages. Clean Water Act Section 404 regulates the discharge of dredged and fill materials into waters of the United States. Waters of the United States refers to oceans, bays, rivers, streams, lakes, ponds and wetlands. EIS Section 4.2 "Vegetation and Wetlands" includes an evaluation of the Intertie impacts on wetlands and determined that none of the Intertie alternatives would result in the discharge of dredged or fill material into any wetland or water. Western will coordinate with Reclamation to ensure compliance with all applicable floodplain and wetland protection standards and requirements applicable to the construction, operation, and maintenance of the transmission line.

Decision

Western's decision is to interconnect the Intertie to Western's system and design, construct, own, operate, and maintain a new 69-kV transmission line, fiber optic cable, disconnects, and related equipment in support of Reclamation's decision to construct the Intertie as summarized above and described in detail in the EIS. This decision is based on the information contained in the DMC Intertie EIS which Western adopted in March 2010 as DOE/EIS-0398. This ROD was prepared in accordance with CEQ Regulations for Implementing NEPA (40 CFR Parts 1500-1508) and DOE NEPA Implementing Procedures (10 CFR Part 1021). Full implementation of this decision is contingent upon the implementation of all identified environmental commitments and

mitigation measures applicable to Western's action and obtaining all applicable permits and approvals.

Use EPA's electronic docket and comment system at <http://www.regulations.gov> to submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the docket that are available electronically. Once in the system, select "search," then key in the docket ID number identified in this document. Please note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing at www.regulations.gov as EPA receives them and without change, unless the comment contains copyrighted material, confidential business information (CBI), or other information whose public disclosure is

restricted by statute. For further information about the electronic docket, go to www.regulations.gov.

Title: NPDES Animal Sectors (Renewal)

ICR Number: EPA ICR No. 1989.07, OMB Control No. 2040-0250.

ICR Status: This ICR is currently scheduled to expire on July 31, 2012. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The purpose of this ICR is to consolidate, streamline, and update EPA's concentrated animal feeding operations (CAFOs) and concentrated aquatic animal production (CAAP) facility ICRs into the currently approved ICR for CAFOs (OMB Control No. 2040-0250). The two ICRs that are being consolidated in this ICR are: (1) NPDES and ELG Regulatory Revisions for Concentrated Animal Feeding Operations (Final Rule) (OMB Control No. 2040-0250); and (2) Concentrated Aquatic Animal Production (CAAP) Effluent Guidelines (OMB Control No. 2040-0258). Additionally, two activities reported in the NPDES Program ICR (OMB Control No. 2040-0004) that are directly related with CAAP facilities or CAFOs will be incorporated in this ICR. (The two activities are the Permit Application for CAAP facilities using form 2B and Other Noncompliance Reports for CAFOs.)

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 1.1 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to
