

FERC data collection	Number of respondents annually (1)	Average Number of responses per respondent (2)	Average burden hours per response ² (3)	Total annual burden hours (1)×(2)×(3)
FERC-555	475	1	4,968	2,359,800

² Record retention burden differs greatly by the size of the company and this figure captures an average across all jurisdictional companies. Thus a small company may require fewer than 1,000 hours per year to comply while a large company may require more than 10,000 hours per year to comply.

The estimated total annual cost burden to respondents includes labor costs associated with record retention (\$65,597,025) and both electronic and non-electronic record storage costs (\$72,400,925). The total annual cost is \$137,997,950; the total annual cost per respondent is \$290,522.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities, which benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated,

electronic, mechanical, or other technological collection techniques or other forms of information technology *e.g.* permitting electronic submission of responses.

Secretary.
