50 CFR Part 660

[Docket No. 090428799-9802-01]

RIN 0648-BA28

Magnuson-Stevens Act Provisions; Fisheries Off West Coast States; Pacific Coast Groundfish Fishery; Inseason Adjustments to Fishery Management Measures

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; inseason adjustments to biennial groundfish management measures; request for comments.

SUMMARY: This final rule makes inseason adjustments to commercial fishery management measures for several groundfish species taken in the U.S. exclusive economic zone (EEZ) off the coasts of Washington, Oregon, and California. These actions, which are authorized by the Pacific Coast Groundfish Fishery Management Plan (FMP), are intended to allow fisheries to access more abundant groundfish stocks while protecting overfished and depleted stocks and to prevent exceeding 2010 optimum yields.

DATES: Effective 0001 hours (local time) October 1, 2010. Comments on this final rule must be received no later than 5 p.m., local time on November 3, 2010.

ADDRESSES: You may submit comments, identified by RIN 0648-BA28, by any one of the following methods:

- *Electronic Submissions:* Submit all electronic public comments via the Federal eRulemaking Portal: <http://www.regulations.gov>.
- *Fax:* 206-526-6736, Attn: Gretchen Hanshew.
- *Mail:* William W. Stelle, Jr., Regional Administrator, Northwest Region, NMFS, 7600 Sand Point Way, NE., Seattle, WA 98115-0070, *Attn:* Gretchen Hanshew.

Instructions: No comments will be posted for public viewing until after the comment period has closed. All comments received are a part of the public record and will generally be

posted to <http://www.regulations.gov> without change. All Personal Identifying Information (for example, name, address, etc.) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information.

NMFS will accept anonymous comments (enter N/A in the required fields, if you wish to remain anonymous). You may submit attachments to electronic comments in Microsoft Word, Excel, WordPerfect, or Adobe PDF file formats only.

FOR FURTHER INFORMATION CONTACT: Gretchen Hanshew (Northwest Region, NMFS), 206-526-6147, *fax:* 206-526-6736, gretchen.hanshew@noaa.gov.

SUPPLEMENTARY INFORMATION:

Electronic Access

This final rule is accessible via the Internet at the Office of the Federal Register's Web site at <http://www.gpoaccess.gov/fr/index.html>. Background information and documents are available at the Pacific Fishery Management Council's (the Council or PFMC) Web site at <http://www.pcouncil.org/>.

Background

On December 31, 2008, NMFS published a proposed rule to implement the 2009-2010 specifications and management measures for the Pacific Coast groundfish fishery (73 FR 80516). The final rule to implement the 2009-2010 specifications and management measures for the Pacific Coast Groundfish Fishery was published on March 6, 2009 (74 FR 9874). This final rule was subsequently amended by inseason actions on April 27, 2009 (74 FR 19011), July 6, 2009 (74 FR 31874), October 28, 2009 (74 FR 55468), February 26, 2010 (75 FR 8820), May 4, 2010 (75 FR 23620), July 1, 2010 (75 FR 38030), July 16, 2010 (75 FR 41386), and August 23, 2010 (75 FR 51684). Additional changes to the 2009-2010 specifications and management measures for petrale sole were made in two final rules: on November 4, 2009 (74 FR 57117), and December 10, 2009 (74 FR 65480). NMFS issued a final rule in response to a duly issued court order on July 8, 2010 (75 FR 39178). These specifications and management measures are at 50 CFR part 660, subpart G.

Changes to the groundfish management measures implemented by this action were recommended by the Council, in consultation with Pacific Coast Treaty Indian Tribes and the States of Washington, Oregon, and

California, at its September 10-16, 2010, meeting in Boise, Idaho. The Council recommended adjusting the groundfish management measures to respond to updated fishery information and other inseason management needs. These changes include increases to bi-monthly cumulative limits in the limited entry trawl commercial fisheries off Washington, Oregon, and California and reductions to daily trip limits (DTL) for sablefish in the limited entry fixed gear and open access commercial fisheries south of 36° N. lat. The increases to cumulative limits are intended to allow additional harvest opportunities for species for which catch estimates through the end of the year are lower than anticipated. The changes to sablefish DTL limits are intended to prevent higher than anticipated sablefish catches from exceeding the 2010 sablefish optimum yield (OY).

Limited Entry Non-Whiting Trawl Fishery

At their September 2010 meeting, the Council received new data and analyses on the catch of groundfish in the limited entry trawl fishery.

Catches of several trawl target species were tracking behind 2010 projections made at the Council's June 2010 meeting, or were projected to be below the 2010 OYs if no adjustments to cumulative limits are made. At their September meeting, the Council considered the most recently available data from the Pacific Fishery Information Network (PacFIN). These data, dated August 18, 2010, indicated the total catch projections through the end of the year for sablefish, longspine thornyheads, shortspine thornyheads, Dover sole, arrowtooth flounder, slope rockfish and other flatfish were lower than anticipated.

The Council considered modest increases to bi-monthly cumulative limits for these species for which the catch is projected to be lower than anticipated in order to meet the Pacific Coast Groundfish FMP objective of achieving, to the extent possible, but not exceeding, OYs of target species. A two-month limit can be raised in the middle of the period, therefore, this increase would become effective during the two-month cumulative limit, on October 1.

Based on the considerations outlined above, the Council recommended and NMFS is implementing the following changes to cumulative limits in the limited entry non-whiting trawl fishery on October 1, 2010 through the end of the year: increase the sablefish trip limits taken with large and small footrope gear North of 40°10' N. lat. and for all trawl gears South of 40°10' N. lat.

from “21,000 lb per 2 months” to “24,000 lb per 2 months”, and taken with selective flatfish trawl gear North of 40°10′ N. lat. from “9,000 lb per 2 months” to “10,000 lb per 2 months”; increase the longspine thornyhead trip limits taken with large and small footrope gear from “24,000 lb per 2 months” to “26,000 lb per 2 months” coastwide; increase the shortspine thornyhead trip limits taken with large and small footrope gear from “18,000 lb per 2 months” to “20,000 lb per 2 months” coastwide; increase the Dover sole trip limits taken with large and small footrope gear North of 40°10′ N. lat. and for all trawl gears South of 40°10′ N. lat. from “100,000 lb per 2 months” to “110,000 lb per 2 months”, and taken with selective flatfish trawl gears from “65,000 lb per 2 months” to “70,000 lb per 2 months” in the north, beginning on October 1 through the end of the year; increase the arrowtooth flounder trip limits taken with large and small footrope gear North of 40°10′ N. lat. from “150,000 lb per 2 months” to “180,000 lb per 2 months” and taken with selective flatfish trawl gear from “90,000 lb per 2 months” to “100,000 lb per 2 months”; increase the arrowtooth flounder trip limits taken with all trawl gears South of 40°10′ N. lat. from “10,000 lb per 2 months” to “12,000 lb per 2 months”; increase the other flatfish trip limits taken with large and small footrope gear North of 40°10′ N. lat. and all trawl gears South of 40°10′ N. lat. from “100,000 lb per 2 months” to “110,000 lb per 2 months”, and taken with selective flatfish trawl gear in the north from “60,000 lb per 2 months” to “70,000 lb per 2 months”; increase the slope rockfish trip limits in the north from “2,000 lb per 2 months” to “4,000 lb per 2 months”. This rule also makes changes to the trip limits for vessels that use multiple types of bottom trawl gears, simultaneously or successively, during a single cumulative limit period. Vessels that use multiple bottom trawl gears are subject to the most restrictive limit, and in most cases this is the trip limit for vessels using selective flatfish trawl gear. Therefore, if trip limits for vessels using selective flatfish trawl gear are modified, the trip limits for vessels using multiple trawl gears will also be modified accordingly.

Sablefish Daily Trip Limit Fishery South of 36° N. Lat.

Catch of sablefish in the limited entry fixed gear and open access daily trip limit (DTL) fisheries south of 36° N. lat. has been higher than anticipated. Based on the most recent fishery information, if no action is taken and catch remains higher than expected, landings of

sablefish through the end of the year would be 1,825 mt. This level of catch would exceed the 2010 sablefish OY for the area south of 36° N. lat. of 1,258 mt by approximately 45 percent. The Council considered several combinations of trip limit reductions in the limited entry fixed gear and open access sablefish DTL fisheries south of 36° N. lat. to allow the fisheries to remain open through the remainder of 2010, while preventing the 2010 sablefish OY for the area south of 36° N. lat. from being exceeded.

Sablefish landings from March through July 2010 were much higher in these fisheries than during that same period in 2009, which had the same trip limits and RCA structure. Therefore, it is most likely that increased participation, particularly new entrants in the open access sector of the non-trawl commercial fishery, has been the primary cause of the higher than expected catches. Therefore, the Council considered larger restrictions to trip limits in the open access sablefish DTL fishery. Modest decreases were also considered for the limited entry fixed gear fishery, to further reduce projected impacts and to prevent the open access fishery from having to be closed entirely to prevent exceeding the 2010 sablefish OY. With these trip limit reductions, projected impacts are not anticipated to exceed 2010 sablefish OY for the area south of 36° N. lat. of 1,258 mt.

Projected impacts to overfished species in the limited entry fixed gear and open access fisheries are calculated assuming the entire sablefish OY is harvested. Therefore, decreases to trip limits to prevent exceeding the 2010 sablefish OY do not result in changes to anticipated impacts to co-occurring overfished groundfish species.

Based on the considerations outlined above, the Council recommended and NMFS is implementing a decrease in the limited entry fixed gear sablefish DTL fishery cumulative limits south of 36° N. lat. from “3,000 lb per week” to “2,800 lb per week” beginning on October 1, 2010 through the end of the year.

Based on the considerations outlined above, the Council recommended and NMFS is implementing restrictions to the open access sablefish DTL fishery trip limits South of 36° N. lat. from “400 lb per day, or 1 landing per week of up to 2,500 lb” to “800 lb per week, not to exceed 1,600 lb per month” beginning on October 1, 2010 through the end of the year.

Classification

This rule makes routine inseason adjustments to groundfish fishery management measures based on the best

available information and is taken pursuant to the regulations implementing the Pacific Coast Groundfish FMP.

These actions are taken under the authority of 50 CFR 660.370(c) and are exempt from review under Executive Order 12866.

These inseason adjustments are taken under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), and are in accordance with 50 CFR part 660, the regulations implementing the FMP. These actions are based on the most recent data available. The aggregate data upon which these actions are based are available for public inspection at the Office of the Administrator, Northwest Region, NMFS, (*see ADDRESSES*) during business hours.

For the following reasons, NMFS finds good cause to waive prior public notice and comment on the revisions to groundfish management measures under 5 U.S.C. 553(b)(B) because notice and comment would be impracticable and contrary to the public interest. Also, for the same reasons, NMFS finds good cause to waive the 30-day delay in effectiveness pursuant to 5 U.S.C. 553(d)(3), so that this final rule may become effective as quickly as possible.

The recently available data upon which these recommendations were based was provided to the Council, and the Council made its recommendations, at its September 10–16, 2010, meeting in Boise, Idaho. The Council recommended that these changes be implemented by October 1, 2010 or as quickly as possible. There was not sufficient time after that meeting to draft this document and undergo proposed and final rulemaking before these actions need to be in effect. For the actions to be implemented in this final rule, affording the time necessary for prior notice and opportunity for public comment would prevent the Agency from managing fisheries using the best available science to approach, without exceeding, the OYs for federally managed species in accordance with the FMP and applicable laws. The adjustments to management measures in this document affect commercial fisheries off Washington, Oregon, and California.

The adjustments to management measures in the limited entry trawl fishery must be implemented in a timely manner to allow fishermen an opportunity to achieve the 2010 OYs specified for limited entry trawl for sablefish, longspine and shortspine thornyheads, Dover sole, arrowtooth flounder, other flatfish, and slope

rockfish. Increases are necessary to relieve a restriction by allowing fishermen increased opportunities to harvest available healthy stocks while staying within the OYs for all species. These changes must be implemented in a timely manner, as quickly as possible, so that fishermen are allowed increased opportunities to harvest available healthy stocks and meet the objective of the Pacific Coast Groundfish FMP to allow fisheries to approach, but not exceed, OYs. It would be contrary to the public interest to wait to implement these changes until after public notice and comment, because making this regulatory change quickly allows additional harvest in fisheries that are important to coastal communities.

Restrictions to cumulative limits in the limited entry fixed gear and open access sablefish DTL fishery are needed to prevent the 2010 sablefish OY in the area South of 36° N. lat. from being exceeded and prevent premature closure of fisheries that take sablefish. These changes must be implemented in a

timely manner by October 1, 2010. Failure to implement trip limit restrictions by October 1, 2010 would risk premature closure of fisheries that are important to coastal communities, which would fail to meet the objectives of the Pacific Coast Groundfish FMP to allow for year round fishing opportunities to provide community stability.

These revisions are needed to keep the harvest of groundfish species within the harvest levels projected for 2010, while allowing fishermen access to healthy stocks. Without these measures in place, the fisheries could risk exceeding harvest levels, causing early and unanticipated fishery closures and economic harm to fishing communities. Delaying these changes would keep management measures in place that are not based on the best available data and that could lead to early closures of the fishery if harvest of groundfish exceeds levels projected for 2010. Such delay would impair achievement of one of the Pacific Coast Groundfish FMP objectives

of providing for year-round harvest opportunities or extending fishing opportunities as long as practicable during the fishing year.

List of Subjects in 50 CFR Part 660

Fisheries, Fishing, Indian Fisheries.

Dated: September 28, 2010.

Emily H. Menashes,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

■ For the reasons set out in the preamble, 50 CFR part 660 is amended as follows:

PART 660—FISHERIES OFF WEST COAST STATES

■ 1. The authority citation for part 660 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. Tables 3 (North) and 3 (South), Table 4 (South), and Table 5 (South) to part 660, subpart G, are revised to read as follows:

BILLING CODE 3510-22-P

Table 3 (North) to Part 660, Subpart G -- 2010 Trip Limits for Limited Entry Trawl Gear North of 40°10' N. Lat.
 Other Limits and Requirements Apply -- Read § 660.301 - § 660.399 before using this table

TABLE 3 (North) cont'

1/ Bocaccio, chilipepper and cowcod are included in the trip limits for minor shelf rockfish.

2/ Splitnose rockfish is included in the trip limits for minor slope rockfish.

3/ "Other flatfish" are defined at § 660.302 and include butter sole, curlfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, and sand sole.

4/ The minimum size limit for lingcod is 22 inches (56 cm) total length North of 42° N. lat. and 24 inches (61 cm) total length South of 42° N. lat.

5/ "Other fish" are defined at § 660.302 and include sharks, skates (including longnose skate), ratfish, morids, grenadiers, and kelp greenling.

Cabezon is included in the trip limits for "other fish."

6/ The Rockfish Conservation Area is an area closed to fishing by particular gear types, bounded by lines specifically defined by latitude and longitude coordinates set out at §§ 660.391-660.394. This RCA is not defined by depth contours, and the boundary lines that define the RCA may close areas that are deeper or shallower than the depth contour. Vessels that are subject to the RCA restrictions may not fish in the RCA, or operate in the RCA for any purpose other than transiting.

7/ The "modified" fathom lines are modified to exclude certain petrale sole areas from the RCA.

8/ If a vessel has both selective flatfish gear and large or small footrope gear on board during a cumulative limit period (either simultaneously or successively), the most restrictive cumulative limit for any gear on board during the cumulative limit period applies for the entire cumulative limit period.

To convert pounds to kilograms, divide by 2.20462, the number of pounds in one kilogram.

Table 3 (South). Continued

	JAN-FEB	MAR-APR	MAY-JUN	JUL-AUG	SEP-OCT	NOV-DEC
Minor shelf rockfish^{1/}, Chilipepper, Shortbelly, Widow, & Yelloweye rockfish						
20 large footrope or midwater trawl for Minor shelf rockfish & Shortbelly	300 lb/ month					
21 large footrope or midwater trawl for Chilipepper	12,000 lb/ 2 months			17,000 lb/ 2 months		
22 large footrope or midwater trawl for Widow & Yelloweye	CLOSED					
23 small footrope trawl for Minor Shelf, Shortbelly, Widow & Yelloweye	300 lb/ month					
24 small footrope trawl for Chilipepper	12,000 lb/ 2 months			17,000 lb/ 2 months		
25 Bocaccio						
26 large footrope or midwater trawl	300 lb/ 2 months					
27 small footrope trawl	CLOSED					
28 Canary rockfish						
29 large footrope or midwater trawl	CLOSED					
30 small footrope trawl	100 lb/ month	300 lb/ month		100 lb/ month		
31 Cowcod	CLOSED					
32 Bronzespotted rockfish	CLOSED					
33 Minor nearshore rockfish & Black rockfish						
34 large footrope or midwater trawl	CLOSED					
35 small footrope trawl	300 lb/ month					
36 Lingcod^{4/}						
37 large footrope or midwater trawl	1,200 lb/ 2 months		4,000 lb/ 2 months			
38 small footrope trawl			1,200 lb/ 2 months			
39 Pacific cod	30,000 lb/ 2 months		70,000 lb/ 2 months			30,000 lb/ 2 months
40 Spiny dogfish	200,000 lb/ 2 months		150,000 lb/ 2 months	100,000 lb/ 2 months		
41 Other Fish^{5/} & Cabezon	Not limited					

TABLE 3 (South) cont

1/ Yellowtail is included in the trip limits for minor shelf rockfish. Bronzespotted rockfish have a species specific trip limit.

2/ POP is included in the trip limits for minor slope rockfish

3/ "Other flatfish" are defined at § 660.302 and include butter sole, curlfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, and sand sole.

4/ The minimum size limit for lingcod is 24 inches (61 cm) total length South of 42° N. lat.

5/ Other fish are defined at § 660.302 and include sharks, skates (including longnose skate), ratfish, morids, grenadiers, and kelp greenling.

6/ The Rockfish Conservation Area is an area closed to fishing by particular gear types, bounded by lines specifically defined by latitude and longitude coordinates set out at §§ 660.391-660.394. This RCA is not defined by depth contours, and the boundary lines that define the RCA may close areas that are deeper or shallower than the depth contour. Vessels that are subject to the RCA restrictions may not fish in the RCA, or operate in the RCA for any purpose other than transiting.

7/ South of 34°27' N. lat., the RCA is 100 fm line - 150 fm line along the mainland coast; shoreline - 150 fm line around islands.

To convert pounds to kilograms, divide by 2.20462, the number of pounds in one kilogram.

Table 4 (South) to Part 660, Subpart G -- 2009-2010 Trip Limits for Limited Entry Fixed Gear South of 40°10' N. Lat.

Other Limits and Requirements Apply -- Read § 660.301 - § 660.399 before using this table

40	RIDGEBACK PRAWN AND, SOUTH OF 38°57.50' N. LAT., CA HALIBUT AND SEA CUCUMBER NON-GROUNDFISH TRAWL					
41	NON-GROUNDFISH TRAWL Rockfish Conservation Area (RCA) for CA Halibut, Sea Cucumber & Ridgeback Prawn:					
42	40°10' - 38° N. lat.	100 fm - modified 200 fm ^{6/}	100 fm - 150 fm			100 fm - modified 200 fm ^{6/}
43	38° - 34°27' N. lat.					
	100 fm - 150 fm					
44	South of 34°27' N. lat.					
	100 fm - 150 fm along the mainland coast; shoreline - 150 fm around islands					
45	<p>Groundfish: 300 lb/trip. Trip limits in this table also apply and are counted toward the 300 lb groundfish per trip limit. The amount of groundfish landed may not exceed the amount of the target species landed, except that the amount of spiny dogfish landed may exceed the amount of target species landed. Spiny dogfish are limited by the 300 lb/trip overall groundfish limit. The daily trip limits for sablefish coastwide and thornyheads south of Pt. Conception and the overall groundfish "per trip" limit may not be multiplied by the number of days of the trip. Vessels participating in the California halibut fishery south of 38°57.50' N. lat. are allowed to (1) land up to 100 lb/day of groundfish without the ratio requirement, provided that at least one California halibut is landed and (2) land up to 3,000 lb/month of flatfish, no more than 300 lb of which may be species other than Pacific sanddabs, sand sole, starry flounder, rock sole, curfin sole, or California scorpionfish (California scorpionfish is also subject to the trip limits and closures in line 31).</p>					
46	PINK SHRIMP NON-GROUNDFISH TRAWL GEAR (not subject to RCAs)					
47	South	<p>Effective April 1 - October 31: Groundfish: 500 lb/day, multiplied by the number of days of the trip, not to exceed 1,500 lb/trip. The following sublimits also apply and are counted toward the overall 500 lb/day and 1,500 lb/trip groundfish limits: lingcod 300 lb/ month (minimum 24 inch size limit); sablefish 2,000 lb/ month; canary, thornyheads and yelloweye rockfish are PROHIBITED. All other groundfish species taken are managed under the overall 500 lb/day and 1,500 lb/trip groundfish limits. Landings of these species count toward the per day and per trip groundfish limits and do not have species-specific limits. The amount of groundfish landed may not exceed the amount of pink shrimp landed.</p>				

TABLE 5 (South) cont

1/ Yellowtail rockfish is included in the trip limits for minor shelf rockfish. POP is included in the trip limits for minor slope rockfish. Bronzespotted rockfish have a species specific trip limit.

2/ "Other flatfish" are defined at § 660.302 and include butter sole, curfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, and sand sole.

3/ The size limit for lingcod is 24 inches (61 cm) total length South of 42° N. lat.

4/ "Other fish" are defined at § 660.302 and include sharks, skates (including longnose skates), ratfish, morids, grenadiers, and kelp greenling.

5/ The Rockfish Conservation Area is an area closed to fishing by particular gear types, bounded by lines specifically defined by latitude and longitude coordinates set out at §§ 660.391-660.394. This RCA is not defined by depth contours (with the exception of the 20-fm depth contour boundary south of 42° N. lat.), and the boundary lines that define the RCA may close areas that are deeper or shallower than the depth contour. Vessels that are subject to RCA restrictions may not fish in the RCA, or operate in the RCA for any purpose other than transiting.

6/ The "modified 200 fm" line is modified to exclude certain petrale sole areas from the RCA.

To convert pounds to kilograms, divide by 2.20462, the number of pounds in one kilogram.
