

Hazard Analysis & Critical Control Points (HACCP) Quality Manuals for both A Foods and May Ao; (5) the A Foods 2009 financial statement; (6) the local registration office notice of address change; (7) a list of the suppliers of May Ao before, and A Foods after, the name change; (8) a list of the customers of May Ao before, and A Foods after, the name change; and (9) customer order forms of May Ao before, and A Foods after, the name change.

Based on the evidence reviewed, we preliminarily find that A Foods is the successor-in-interest to May Ao. We find that A Foods operates as the same business entity as May Ao and that the production facilities, supplier relationships, and customers have not changed as a result of the name change. Further, A Foods operates under the same HACCP Plan originally prepared by May Ao, and the senior management for A Foods has remained the same since the name change from May Ao. Thus, we preliminarily find that A Foods should receive the same antidumping duty cash-deposit rate (*i.e.*, 2.61 percent) with respect to the subject merchandise as May Ao, its predecessor company.

However, because cash deposits are only estimates of the amount of antidumping duties that will be due, changes in cash deposit rates are not made retroactive. If A Foods believes that the deposits paid exceed the actual amount of dumping, it is entitled to request an administrative review during the anniversary month of the publication of the order of those entries to determine the proper assessment rate and receive a refund of any excess deposits. See *Certain Hot-Rolled Lead and Bismuth Carbon Steel Products From the United Kingdom: Final Results of Changed-Circumstances Antidumping and Countervailing Duty Administrative Reviews*, 64 FR 66880 (Nov. 30, 1999). As a result, if these preliminary results are adopted in our final results of this changed circumstances review, we will instruct U.S. Customs and Border Protection to suspend shipments of subject merchandise made by A Foods at May Ao's cash deposit rate (*i.e.*, 2.61 percent) effective on the publication date of our final results.
