[Docket No. FAA–2010–0651; Airspace Docket No. 10–ANM–7]

**Amendment of Class D and Class E Airspace; Klamath Falls, OR**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action will amend Class D and Class E airspace at Klamath Falls, OR. Decommissioning of the Merrill

Non-Directional Radio Beacon (NDB) at Klamath Falls Airport has made this action necessary for the safety and management of Instrument Flight Rules (IFR) operations at the airport. This action also will adjust the geographic coordinates of the airport and a navigation aid, and will change the name of the airport.

**DATES:** *Effective Date:* 0901 UTC, January 13, 2011. The Director of the Federal Register approves this incorporation by reference action under 1 CFR Part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

**SUPPLEMENTARY INFORMATION:**

**History**

On August 16, 2010, the FAA published in the **Federal Register** a notice of proposed rulemaking to amend controlled airspace at Klamath Falls, OR (75 FR 49866). Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Class D and Class E airspace designations are published in paragraph 5000, 6002, 6004 and 6005, respectively, of FAA Order 7400.9U dated August 18, 2010, and effective September 15, 2010, which is incorporated by reference in 14 CFR 71.1. The Class D and Class E airspace designations listed in this document will be published subsequently in that Order.

**The Rule**

This action amends Title 14 Code of Federal Regulations (14 CFR) Part 71 by amending Class E airspace extending upward from 700 feet above the surface at Klamath Falls Airport, Klamath Falls, OR. Decommissioning of the Merrill NDB and cancellation of the NDB approach has made this action necessary for the safety and management of IFR operations at the airport. The geographic coordinates of the Klamath Falls Airport, and the Klamath Falls VHF Omni-Directional Radio Range Tactical Air Navigation Aid (VORTAC), listed in the descriptions of the Class D and Class E airspace areas, will be adjusted in accordance with the FAA's National Aeronautical Navigation Services (NANS). The airport name will be corrected from Klamath Falls

International Airport to Klamath Falls Airport.

The FAA has determined this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106 discusses the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it modifies controlled airspace at Klamath Falls Airport, Klamath Falls, OR.
