

remaining components into the finished boilers. The number of components, the least of which being 50, is a meaningful assembly of individual components into the finished boilers. Although some of the more expensive parts are not of Canadian origin, no one part could function or run the boiler without the others.

Therefore, based on the totality of the circumstances in this case, we find that the Canadian processing results in a substantial transformation of the components and that the *DynaFlame*, *DynaForce*, and *DynaMax* boilers should be considered products of Canada for the purpose of U.S. Government procurement.

HOLDING:

Based on the facts of this case, the country of origin of the Camus *DynaFlame*, *DynaForce*, and *DynaMax* heating boilers is Canada for purposes of U.S. Government procurement.

Notice of this final determination will be given in the Federal Register, as required by 19 C.F.R. § 177.29. Any party-at-interest other than the party which requested this final determination may request, pursuant to 19 C.F.R. § 177.31 that CBP reexamine the matter anew and issue a new final determination. Pursuant to 19 C.F.R. § 177.30, any party-at-interest may, within 30 days of publication of the Federal Register Notice referenced above, seek judicial review of this final determination before the Court of International Trade.

Sincerely,
