[Project No. 13823-000]

Natural Currents Energy Services, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

October 20, 2010.

On August 5, 2010, Natural Currents Energy Services, LLC filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Killisnoo Tidal Energy Project (Killisnoo Project), located in Kootznahoo Inlet northeast of Killisnoo Island, near the City of Angoon in the Skagway-Hoonah-Angoon Census Area of southeastern Alaska. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed Killisnoo Project would consist of: (1) A moored test platform or dock, or underwater tethering device, pending evaluation of specific site conditions; (2) ten 25-kilowatt (kW) Red Hawk in-stream turbine modules for a total generating capacity of 250 kW; (3) an approximately 650-foot-long, 480-volt underwater transmission line connecting the Red Hawk modules to an existing above-ground local distribution system; and (4) appurtenant facilities. The project would have an estimated average annual generation of 1,000 megawatt-hours.
