

proceeding after this margin was selected in calculating the rate for the PRC-wide entity in the investigation's *Innersprings Investigation Prelim*.¹⁷ As there is no information on the record of this review that demonstrates that this rate is not appropriate for use as AFA, we determine that this rate continues to have relevance.

As the 234.51 percent rate is both reliable and relevant, we determine that it has probative value and is corroborated to the extent practicable, in accordance with section 776(c) of the Act. Therefore, we have assigned this AFA rate to exports of the subject merchandise by the PRC-wide entity.

COMMODITY FUTURES TRADING COMMISSION

Request for Comment on a Proposal to Exempt, Pursuant to the Authority in Section 4(c) of the Commodity Exchange Act, the Trading and Clearing of Certain Products Related to the CBOE Gold ETF Volatility Index and Similar Products

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of Proposed Order and Request for Comment.

SUMMARY: The Commodity Futures Trading Commission (“CFTC” or the “Commission”) is proposing to exempt the trading and clearing of certain contracts called “options” (“Options”) on the CBOE Gold ETF Volatility Index (“GVZ Index”), which would be traded on the Chicago Board Options Exchange (“CBOE”), a national securities exchange, and cleared through the

Options Clearing Corporation (“OCC”) in its capacity as a registered securities clearing agency, from the provisions of the Commodity Exchange Act (“CEA”) ¹ and the regulations thereunder, to the extent necessary to permit such Options on the GVZ Index to be so traded and cleared. Authority for this exemption is found in Section 4(c) of the CEA.² The Commission is also requesting comment regarding whether the Commission should provide a categorical exemption that would permit the trading and clearing of options on indexes that measure the volatility of shares of gold exchange-traded funds (“ETFs”) generally, regardless of issuer, including options on any index that measures the magnitude of changes in, and is composed of the price(s) of shares of one or more gold ETFs and the price(s) of any other instrument(s), which other instruments are securities as defined in the Securities Exchange Act of 1934 (“the ‘34 Act”).³

SUPPLEMENTARY INFORMATION:

I. Introduction

The OCC is both a Derivatives Clearing Organization (“DCO”) registered pursuant to Section 5b of the CEA,⁴ and a securities clearing agency registered pursuant to Section 17A of the ‘34 Act.⁵

OCC has filed with the CFTC, pursuant to Section 5c(c) of the CEA and Commission Regulations 39.4(a) and 40.5 thereunder,⁶ a request for approval of a rule that would enable OCC to clear and settle Options on the GVZ Index traded on the CBOE, a national securities exchange, in its capacity as a registered securities clearing agency (and not in its capacity as a DCO).⁷ Section 5c(c)(3) of the CEA provides that the CFTC must approve such a rule submitted for approval unless it finds that the rule would violate the CEA.

The GVZ Index is an index that measures the implied volatility of options on shares of the SPDR® Gold Trust (“SPDR® Gold Trust Shares”), an ETF designed to reflect the performance of the price of gold bullion.⁸
