II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, BX included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. BX has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

BX proposes to amend the fees assessed for use of the Testing Facility. The Testing Facility provides subscribers with a virtual BX System test environment that closely approximates the production environment, on which they may test their automated systems that integrate with BX. Subscribers may test upcoming BX releases and product enhancements, as well as test software prior to implementation. Currently, BX assesses a fee of \$285 per hour for active connection testing using current BX access protocols during the normal operating hours, and \$333 per hour for such testing after hours.

BX does not currently assess a fee for idle test ports. Subscribers often have test ports assigned to them through which no testing is conducted for extended periods, yet BX must maintain and constantly monitor these idle testing ports for purposes of billing under the current rule. Such monitoring represents a cost to BX with no offsetting fee. Further, subscribers have no incentive to notify BX when they have completed testing and no longer require a test port. Accordingly, BX is proposing to eliminate the current hourly fee structure and assess a flat fee of \$300 per test port, per month. This fee will cover the cost of maintaining these test

ports and provide an incentive to firms to cancel test ports when they have completed testing.

BX notes that it will continue to allow new subscribers and existing subscribers to test new services and modifications initiated by BX, and to test new services not previously accessed for the first 30 days at no cost pursuant to Rule 7030(d)(3). This 30-day fee waiver includes testing for subscribers that are accessing BX through a service bureau for the first time. Subscribers must cancel the test port prior to the expiration of the 30-day free period in order to avoid future charges for test ports under the new rule. In addition, current subscribers will be able to cancel their idle ports at no cost at any point during the first month that the fee is effective. Further, BX is eliminating the word “hourly” from Rule 7030(d)(3), since the fees for the Testing Facility no longer include hourly fees. Last, BX is eliminating from Rule 7030(d)(3) language concerning market data feed testing, since it is superfluous given that the rule already references fees that include such testing.

2. Statutory Basis

BX believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,³ in general, and with Section 6(b)(4) of the Act,⁴ in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system which BX operates or controls. The amended fee schedule applies to all subscribers equally based on the number of test ports subscribed. This proposed charge would apply to both members that obtain test ports for direct access and non-member service bureaus that act as a conduit for orders entered by BX members that are their customers. The proposed fees will cover the costs associated with separately offering the service, responding to customer requests, configuring BX’s systems, programming to user specifications, and administering the service, among other things, and may provide BX with a profit to the extent costs are covered. BX believes that the proposed fee structure strikes a balance between covering these costs, and providing incentives to subscribers to make efficient use of Test Facility ports.

B. Self-Regulatory Organization’s Statement on Burden on Competition

BX does not believe that the proposed rule change will result in any burden on

competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended.

C. Self-Regulatory Organization's Statement on Comments Regarding the Proposed Rule Change Received From Members, Participants or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act⁵ and subparagraph (f)(2) of Rule 19b-4 thereunder.⁶ At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:
