SUPPLEMENTARY INFORMATION:

I. Notice of Application for Recognition

The Occupational Safety and Health Administration (OSHA) is providing notice that TUV Rheinland PTL, LLC, (TUVPTL) applied for recognition as a NRTL. (*See Ex. 2—TUVPTL recognition application dated 7/29/2008.*)¹ The application covers testing and certification of the equipment or materials, and use of the supplemental programs, listed below.

OSHA recognition of a NRTL signifies that the organization meets the legal requirements specified in 29 CFR 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within its scope of recognition, and is not a delegation or grant of

¹ A number of documents, or information within documents, described in this **Federal Register** notice are the applicant's internal, detailed procedures or contain other confidential business or trade-secret information. These documents and information, designated by an "NA" at the end of, or within, the sentence or paragraph describing them, are not available to the public.

government authority. As a result of recognition, employers may use products approved by the NRTL to meet OSHA standards that require product testing and certification.

The Agency processes applications by a NRTL for initial recognition, or for an expansion or renewal of this recognition, following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the Agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides its preliminary finding, and, in the second notice, the Agency provides its final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. OSHA maintains an informational Web page for each NRTL that details its scope of recognition. These pages can be accessed from OSHA's Web site at <http://www.osha.gov/dts/otpca/nrtl/index.html>. Each NRTL's scope of recognition has three elements: (1) The type of products the NRTL may test, with each type specified by its applicable test standard; (2) the recognized site(s) that has/have the technical capability to perform the product testing and certification activities for test standards within the NRTL's scope; and (3) the supplemental program(s) that the NRTL may use, each of which allows the NRTL to rely on other parties to perform activities necessary for product testing and certification.

II. General Background on the Application

In its application, TUVPTL lists the current address of the laboratory facility covered by the application as: TUV Rheinland PTL, 2210 South Roosevelt Street, Tempe, Arizona 85282. According to public information (<http://www.tuvptl.com/tuv-ptl-history.html>), TUVPTL states that it is a testing and certification laboratory for photovoltaic products, and a leading test organization for photovoltaic technology. Arizona State University (ASU) established the organization in 1992, as the Photovoltaic Testing Laboratory (PTL). The TUVPTL Web site states that the PTL was instrumental in the development of many major standards concerning photovoltaic products. It was part of ASU until becoming an affiliate of TUV Rheinland Group.

TUV Rheinland North America, Inc., (TUVRNA), a currently recognized NRTL, submitted an application, dated July 29, 2008, to expand its recognition to include TUVPTL as a recognized site.
