Basis and Purpose

The subject bridge is the S443 Swing Bridge across the Bayou Liberty at mile 2.0, in St. Tammany Parish. The vertical clearance is 7.59 feet (2.31m) above the 2% flowline, elevation 2.5 feet (0.76m) NAVD 1988.

Presently, under 33 CFR 117.469, the draw of the S433 Bridge, mile 2.0, at Slidell, shall open on signal, except that between 7 p.m. and 7 a.m., the draw shall open on signal if at least two hours notice is given.

The owner requests a test to allow the public to experience the new schedule and determine if the two hour advance notice is sufficient. The current

regulation has been in effect since 2008; however, the bridge for which the regulation was in place (a pontoon bridge) no longer exists. With the completion of the new bridge (a swing bridge) in April 2010, there has been an average of less than one opening per month, which is down from an average of 70 per month in previous years. Currently the land traffic outpaces marine traffic but most all traffic is local and marine traffic is recreational. Vessels will be able to pass under the bridge during the deviation and therefore no alternate routes are recommended at this time.

This request is in conjunction with a Notice of Proposed Rulemaking to make the test deviation schedule changes permanent.

This deviation is effective from December 7, 2010 through January 6, 2011.

Vessel counts were collected and analyzed by the owner and reflect a marked reduction in the number of required openings since the completion of the new bridge and removal of the old one. The expected impact on navigation during the test period will be minimal based on the increase in vertical clearance. The test deviation will allow the bridge to remain unmanned during most of the day by requiring a two-hour notice for an opening of the draw.

Coordination will be through Public Notice and Local Notice to Mariners upon date of publication in the **Federal Register**.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the designated time period.

This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: October 26, 2010.

David M. Frank,

Bridge Administrator.
