

As stewards of cultural heritage, information and ideas, museums and libraries have traditionally played a vital role in helping us experience, explore, discover and make sense of the world. That role is now more essential than ever. Through building technological infrastructure and strengthening community relationships, libraries and museums can offer the public unprecedented access to and expertise in transforming information overload into knowledge. IMLS provides leadership and funding for the nation's museums and libraries, to help them fulfill their mission of becoming centers of life-long learning crucial to achieving personal fulfillment, a productive workforce and an engaged citizenry.

Consistent with this (20 U.S.C. Chapter 72, 20 U.S.C. 9108), the intention of the PDMLS is to monitor expectations of and satisfaction with library and museum services. A wide range of topics will be covered, with a small number of questions about each topic included on the survey.

The purpose of this survey is to determine attitudes, assess awareness of issues related to library and museum services, and tracking trends. The survey will be used to gather information on a wide range of library and museum services. The design of the PDMLS will be a random digital dial ("RDD") telephone survey of the adult, non-institutionalized U.S. population which will yield a minimum of 3,000 cases.

The PDMLS will include a core set of demographic questions (e.g., age, gender, race, geographic area) as well as a core set of questions that are based on critical information needs within IMLS (e.g., satisfaction with the library and museum services as a whole; frequency of utilization of various services; physical and virtual access to services). In addition to these core questions, supplemental questions may also be included. The telephone survey is projected to average 18 to 20 minutes to complete.

Agency: Institute of Museum and Library Services.

Title: Public Demand for Museum and Library Services Survey.

OMB Number: To Be Determined.

Frequency: Anticipated for Every Three Years.

Affected Public: The target population for the Public Demand for Museum and Library Services Survey is the noninstitutionalized population, aged 18 and older, who live in the United States. A national probability sample of households generated using list-assisted random digit dialing (RDD)

methodology will be employed by the survey. Individual survey respondents within selected households will be chosen at random.

Number of Respondents: 3,000.

Estimated Average Burden per Response: The burden per respondent is estimated to be an average of 18 minutes based on the size of the questionnaire.

Estimated Total Annual Burden: 900 hours (that is 18 minutes times 3,000 respondents equals 54,000 minutes or 900 hours).

Total Annualized Capital/Startup Costs: n/a.

Total Annual Costs: To be determined.

Public Comments Invited: Interested parties are invited to send comments regarding any aspect of this information collection, including, but not limited to: (1) The necessity and utility of the information collection for the proper performance of the functions of IMLS; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the collected information; and (4) ways to minimize the collection burden without reducing the quality of the collected information. Comments submitted in response to this notice will be summarized and/or included in the request for OMB's clearance of this information collection.

FOR FURTHER INFORMATION CONTACT:

Carlos Manjarrez, Associate Deputy for Research and Statistics, Institute of Museum and Library Services, 1800 M St., NW., 9th Floor, Washington, DC 20036. Mr. Manjarrez can be reached by Telephone: 202-653-4671, Fax: 202-653-4600, or by e-mail at cmanjarrez@imls.gov, or by teletype (TTY/TDD) for persons with hearing difficulty at 202/653-4614. Office hours are from 8:30 a.m. to 5 p.m., E.T., Monday through Friday, except Federal holidays.

Dated: November 22, 2010.

Kim Miller,

Management Analyst.

BILLING CODE 7036-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. NRC-2010-0338]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to the Office of Management and

Budget (OMB) and solicitation of public comment.

SUMMARY: The NRC invites public comment about our intention to request the OMB's approval for renewal of an existing information collection that is summarized below. We are required to publish this notice in the **Federal Register** under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. *The title of the information collection:* "DOE/NRC Form 741 (Nuclear Material Transaction Report) and Associated Instructions (NUREG/BR-0006)"

2. *Current OMB approval number:* 3150-0003.

3. *How often the collection is required:* Form 741 is submitted when specified events occur (nuclear material or source material transfers, receipts, or inventory changes).

4. *Who is required or asked to report:* Persons licensed to possess specified quantities of special nuclear material or source material. Any licensee who ships, receives, or otherwise undergoes an inventory change of special nuclear or source material is required to submit a Form 741 to document the change.

5. *The number of annual respondents:* For DOE/NRC Form 741, there are approximately 400 respondents annually.

6. *The number of hours needed annually to complete the requirement or request:* 20,616 hours.

7. *Abstract:* NRC is required to collect nuclear material transaction information for domestic safeguards use and to make it available to the International Atomic Energy Agency (IAEA). Licensees use Form 741 to make inventory and accounting reports for certain source or special nuclear material, or for transfer or receipt of 1 kilogram or more of source material. This form enables NRC to collect, retrieve, analyze, and submit the data to IAEA to fulfill its reporting responsibilities.

Submit, by January 28, 2011, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the draft supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O-1 F21, Rockville, MD 20852. OMB clearance requests are available at the NRC worldwide Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/index.html>. The document will be available on the NRC home page site for 60 days after the signature date of this notice. Comments submitted in writing or in electronic form will be made available for public inspection. Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed. Comments submitted should reference Docket No. NRC-2010-0338. You may submit your comments by any of the following methods. Electronic comments: Go to <http://www.regulations.gov> and search for Docket No. NRC-2010-0338. Mail comments to NRC Clearance Officer, Tremaine Donnell (T-5 F53), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Questions about the information collection requirements may be directed to the NRC Clearance Officer, Tremaine Donnell (T-5 F53), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, by telephone at 301-415-6258, or by e-mail to INFOCOLLECTS.Resource@NRC.GOV.

Dated at Rockville, Maryland this 19th day of November 2010.

For the Nuclear Regulatory Commission,
Tremaine Donnell,
NRC Clearance Officer, Office of Information Services.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-335 and 50-389; NRC-2010-0363]

Florida Power and Light Company, St. Lucie Plant, Units 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC or the Commission) is considering issuance of an exemption from Title 10 of the *Code of Federal Regulations* (10 CFR) Part 26, Section 26.9, for Facility Operating License Nos. DPR-67 and NPF-16, issued to Florida Power and Light Company, *et al.* (the licensee), for operation of St. Lucie

Plant, Units 1 and 2, located on Hutchinson Island in St. Lucie County, Florida. Therefore, as required by 10 CFR 51.21, the NRC performed an environmental assessment. Based on the results of the environmental assessment, the NRC is issuing a finding of no significant impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action would consider approval of an exemption for St. Lucie Plant, Units 1 and 2, from certain requirements of 10 CFR Part 26, "Fitness-for-Duty Rule." Specifically, the licensee requests approval of an exemption from the requirements of 10 CFR 26.205(c), "Work hours scheduling," and (d), "Work hour controls."

The licensee states that during severe weather conditions, for example, tropical storms or hurricane force winds, adherence to all work hour controls requirements could impede the licensee's ability to use whatever staff resources may be necessary to prepare the site for a pending severe weather event and ensure that the plant reaches and maintains a safe and secure status.

The exemption would only apply to severe weather conditions where tropical storm or hurricane force winds are predicted onsite requiring severe weather preparations, and activation and sequestering of the St. Lucie storm crew.

The proposed exemption will allow the licensee to not meet the requirements of 10 CFR 26.205(c) and (d), from the time severe weather site preparation begins until exit conditions are satisfied. The exemption would only apply to individuals on the storm crew who perform duties identified in 10 CFR 26.4(a)(1) through (a)(5). When storm crew sequestering exit conditions are met, full compliance with 10 CFR 26.205(c) and (d) will be required.

The proposed action does not involve any physical changes to the reactor, fuel, plant, structures, support structures, water, or land at the St. Lucie Plant, Units 1 and 2, site.

The proposed action is in accordance with the licensee's application dated October 16, 2009.

The Need for the Proposed Action

Proposed action is needed because the licensee is unable to meet the requirements of 10 CFR 26.205(c) and (d) during declarations of severe weather conditions that could result due to prevailing tropical storm or hurricane force winds impacting the facility.

Compliance with work hour control requirements could impede the

licensee's ability to use whatever staff resources may be necessary to respond to a plant emergency and ensure that the plant reaches and maintains a safe and secure status.

Environmental Impacts of the Proposed Action

The NRC staff has completed its environmental assessment of the proposed exemption. The NRC staff has concluded that the proposed exemption from the implementation of the requirements of 10 CFR 26.205(c) and (d) during declaration of severe weather conditions, would not significantly affect plant safety and would not have a significant adverse effect on the probability of occurrence of an accident.

The proposed action would not result in any increased radiological hazards beyond those previously evaluated by the NRC staff in the Safety Evaluation Reports, dated November 8 and November 7, 1974, related to operation of St. Lucie Plant, Units 1 and 2, respectively. No changes are being made in the types of effluents that may be released offsite. There is no significant increase in the amount of any effluent released offsite. There is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

The proposed action does not result in changes to land use or water use, or result in changes to the quality or quantity of non-radiological effluents. No changes to the National Pollution Discharge Elimination System permit are needed. No effects on the aquatic or terrestrial habitat in the vicinity or the plant, or to threatened, endangered, or protected species under the Endangered Species Act, or impacts to essential fish habitat covered by the Magnuson-Stevens Act are expected. There are no impacts to the air or ambient air quality. There are no impacts to historical and cultural resources. There would be no noticeable effect on socioeconomic conditions in the region. Therefore, no changes or different types of non-radiological environmental impacts are expected as a result of the proposed action. Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

The licensee currently maintains a Hurricane Plan that provides directions for activation of the storm crew. The storm crew is activated upon the direction of the Emergency Coordinator, typically the site Plant General Manager or designee. This individual is qualified as an Emergency Coordinator during a
