Pennamaquan Tidal Power, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

December 8, 2010.

On November 22, 2010, Pennamaquan Tidal Power, LLC filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Pennamaquan Tidal Power Plant Project to be located on the Pennamaquan River and Cobscook Bay, Washington County, Maine. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of: (1) A 692-acre tidal area of the Pennamaquan River and Cobscook Bay; (2) two new impervious core, sand, and crushed rock embankments, one 689-foot-long and another 164-foot-long; (3) a new 505-foot-long concrete modular

wall panel extending about 11 feet above mean sea level consisting of: (a) New concrete support columns; (b) a new boat lift; and (c) a new powerhouse with four reversible bulb generating units with a total capacity of 21.1 megawatts; and (4) a new 35 kilovolt, 2.5-mile-long transmission line. The project would produce an estimated average annual generation of about 66,400 megawatt-hours.

Applicant Contact: Andrew Landry, 45 Memorial Circle, PO Box 1058, Augusta, ME 04332, phone: (207) 791-3191, e-mail: alandry@preti.com.

FERC Contact: Tom Dean (202) 502-6041.

Deadline for filing comments, motions to intervene, competing applications (without notices of intent), or notices of intent to file competing applications: 60 days from the issuance of this notice. Competing applications and notices of intent must meet the requirements of 18 CFR 4.36. Comments, motions to intervene, notices of intent, and competing applications may be filed electronically via the Internet. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. Lock+™ Hydro Friends Fund XLVII, FFP Missouri 16, LLC, et al.; Notice of Competing Preliminary Permit Applications Accepted for Filing and Soliciting Comments, and Motions To Intervene

December 8, 2010.

Lock+™ Hydro Friends Fund XLVII, FFP Missouri 16, LLC	Project No. 13743-000.
	Project No. 13753-000.
Solia 7 Hydroelectric, LLC.	Project No. 13769-000.
Three Rivers Hydro, LLC.	Project No. 13785-000.
Opekiska Hydro, LLC	Project No. 13791-000.

On May 18, 2010, Lock+ Hydro Friends Fund XLVII, FFP Missouri 16, LLC, Solia 7 Hydroelectric, LLC, and Three Rivers Hydro, LLC, filed applications, and on May 19, 2010, Opekiska Hydro, LLC, filed an application, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of hydropower at the U.S. Army Corps of Engineers Opekiska Lock and Dam on the Monongahela River in Monongahela County, West Virginia. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

Descriptions of the proposed Opekiska Lock and Dam Projects:

Lock+™ Hydro Friends Fund XLVII's proposed project (Project No. 13743-000) would consist of: (1) One lock frame module 109 feet long, 40 feet high, and weighing 1.16 million pounds each, and containing 10 generating units with a total combined capacity of 20 megawatts (MW); (2) a 57-foot-high, 75-foot-long prefabricated concrete wall attached to pilings in the river to support the lock frame module; (3) a 25-foot-long, 50-foot-wide switchyard containing a transformer; and (4) a 4,000-foot-long, 69-kilovolt (kV) transmission line to an existing substation. The proposed project would have an average annual generation of 87.66 gigawatt-hours (GWh), which would be sold to a local utility.
