Notification to Importers

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

These preliminary results of administrative review are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for renewal of a currently approved information collection.

This collection-of-information describes special permits issued to participants in the Pacific halibut subsistence fishery in waters off the coast of Alaska and any appeals resulting from denials. The National Marine Fisheries Service (NMFS) designed the permits to work in conjunction with other halibut harvest assessment measures. Subsistence fishing for halibut has occurred for many years among the Alaska Native people and non-Native people. Special permits in this collection-of-information are initiated in response to the concerns of Native and community groups regarding increased restrictions in International Pacific Halibut Commission Area 2C and include Community Harvest Permits, Ceremonial Permits, and Educational Permits.

A Community Harvest Permit allows the community or Alaska Native tribe to

appoint one or more individuals from its respective community or tribe to harvest subsistence halibut from a single vessel under reduced gear and harvest restrictions. Ceremonial and Educational Permits are available exclusively to Alaska Native tribes. Eligible Alaska Native tribes may appoint only one Ceremonial Permit Coordinator per tribe for Ceremonial Permits or one authorized Instructor per tribe for Educational Permits.

Except for enrolled students fishing under a valid Educational Permit, special permits require persons fishing under them to also possess a Subsistence Halibut Registration Certificate (SHARC) (see OMB Control No. 0648-0460) which identifies those persons who are currently eligible for subsistence halibut fishing. Each of the instruments is designed to minimize the reporting burden on subsistence halibut fishermen while retrieving essential information.

II. Method of Collection

Respondents have a choice of either electronic or paper forms. Methods of submittal include online, e-mail of electronic forms, mail, and facsimile transmission of paper forms. Educational Permits may not be applied for online.

FOR FURTHER INFORMATION CONTACT:

Colette Cairns or Amy Hapeman, (301) 713-2289.

SUPPLEMENTARY INFORMATION: The subject modification to Permit No. 10022-01 is requested under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226).

Permit 10022-01, issued on May 12, 2010 (75 FR 26715) authorizes the permit holder to conduct research off the northwest coast of Florida. Researchers may capture loggerhead (*Caretta caretta*), green (*Chelonia mydas*), and Kemp's ridley (*Lepidochelys kempii*) sea turtles by strike-net or set-net. Animals may be weighed, measured, photographed, skin biopsied, flipper and passive integrated transponder (PIT) tagged, and released. Researchers also are authorized to perform a subset of activities on sea turtles legally captured by relocation trawlers. A subset of sea turtles may have transmitters attached to assess habitat use and study whether relocation distances for sea turtles captured by relocation trawlers are appropriate.

Dr. Carthy requests a modification to the permit to: (1) Increase the number of sea turtles (up to 50 loggerheads, 350 greens, and 200 Kemp's ridleys) that may be taken annually; (2) authorize satellite tagging for captured loggerhead and Kemp's ridleys; and (3) authorize three additional research activities (epibiota removal, blood sampling, and carapace swabbing) for up to 30 captured animals of each species annually. A subset of the green sea turtles will also be captured by hand/dip net, flipper and PIT tagged, measured, weighed, photographed, and temporarily carapace marked. This work would assess changes in sea turtle abundance, physical characteristics, and habitat use in the area relative to

historical data and assess potential impacts of Mississippi Canyon 252 oil to sea turtles for the Natural Resources Damage Assessment. The modification would be valid until the permit expires on April 30, 2013.

Dated: December 13, 2010.

Tammy C. Adams,

Acting Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.
