SUPPLEMENTARY INFORMATION:

Background and Purpose

On November 18, 2010, the Coast Guard published a final rule (75 FR 70595) regarding special load line regimes for certain river barges operating on Lake Michigan. This rule finalized interim regulations that have been in effect since 2002, with some changes. The final regulations are scheduled to go into effect on December 20, 2010. For reasons explained herein, we are extending the effective date of the revised weather restrictions (found in 46 CFR Table 45.171, § 45.187, and § 45.191(a) of the final rule) for 6 months and requesting public comment on that provision.

United States vessels operating on Lake Michigan are normally required to have a load line assignment. River barges do not typically qualify for load line assignment because their hull construction is not robust enough for unrestricted operations on the Great
