Title of Proposal: Housing Choice Voucher Program Administrative Fee Study.

Description of Information Collection:

This request is for the clearance of on-site data collection from public housing agencies (PHAs). The proposed data collection has three purposes: (1) To identify a sample of PHAs that are verified to be operating high-performing and efficient HCV programs, (2) to test alternative methods of measuring time spent on administrative functions in the HCV program, and (3) to collect information on the factors that affect administrative costs in the HCV program. The proposed data collection will take place through site visits to 60 PHAs and will include interviews with PHA staff, interviews with program partners, and reviews of client files and administrative data collected by the PHA, included documentation related to the HCV program budget. In addition, at 5 of the 60 sites the research team will beta-test three alternative methods of collecting data on PHA staff time spent on the range of activities required to administer the HCV program. The results of the site visits and beta-tests will be used to develop the research design, sampling approach, and data collection instruments for a national study of the costs of administering the HCV program based on direct measurement of staff and other program costs among a sample of high-performing HCV programs. The results of this national study—for which separate OMB clearance will be sought—will be used to estimate administrative fees and develop a new administrative fee allocation formula for the HCV program.

OMB Control Number: 2528-NEW.

Agency Form Numbers: None.

Members of Affected Public: Up to 375 public housing agency staff persons (an average of 5 staff members at each of the 60 sites, plus up to 15 staff members at the 5 beta-test sites) and up to 180 staff from partner organizations (an average of 3 representatives of partner organizations at each of the 60 sites).

Estimation of the total numbers of hours needed to prepare the information collection including number of respondents, frequency of responses, and hours of response: The average time for a PHA staff person to complete the interview is 1.5 hours. Up to 5 PHA staff will be interviewed per site, for a maximum estimated burden for the PHA

staff interviews of 600 hours (300 people times 2 hours per person). In addition, up to 3 representatives of program partners will be interviewed per site, for a maximum estimated burden for the program partner interviews of 180 hours (180 people times 1 hour per person). Finally, at the 5 beta-test sites, up to 15 PHA staff will spend up to 20 minutes per day for 5 days documenting time spent on various activities related to voucher program administration, for a maximum estimated staff burden of 127.5 hours (75 people times 1.7 hours per person). These same staff will also participate in 1 hour of training related to the beta-test data collection, for a maximum staff burden of 75 hours (75 staff times 1 hour per person). The total estimated burden across the three data collection activities for the study is 980 hours.

Authority: The Paperwork Reduction Act of 1995, 44 U.S.C. chapter 35, as amended.

BILLING CODE 4210-67-P

DEPARTMENT OF THE INTERIOR**Bureau of Ocean Energy Management, Regulation and Enforcement****Commercial Lease for the Cape Wind Energy Project**

AGENCY: Bureau of Ocean Energy Management, Regulation and Enforcement, Interior.

ACTION: Notice of Availability ("NOA") of a Commercial Lease of Submerged Lands for Renewable Energy Development on the Outer Continental Shelf ("OCS") for the Cape Wind Energy Project.

SUMMARY: Pursuant to its authority under the Outer Continental Shelf Lands Act ("OCSLA"), 43 U.S.C. 1331 *et seq.*, as amended; and the Renewable Energy and Alternate Uses of Existing Facilities on the Outer Continental Shelf Rules, 30 CFR part 285 ("Rule"), BOEMRE has issued a Commercial Lease ("Lease") for an area of approximately 46 square miles on the OCS in Nantucket Sound off the coast of Cape Cod, Massachusetts. This NOA is being published to announce the availability of the Lease in accordance with the requirements of 30 CFR 285.231. The Lease is for the Cape Wind Energy Project ("Project") which grants Cape Wind Associates, LLC, ("CWA") the exclusive right to conduct certain activities within the leased area, subject to the terms and conditions of the Lease, and applicable laws and regulations. The Lease requires CWA to pay \$88,278 in annual rent prior to production, and a two to seven percent operating fee rate following the start of production during the 33-year lease (a 5-year site assessment term and a 28-year commercial operations term). The rent and operating fee are based on the requirements set forth in 30 CFR part 285, subpart E. The Project plan calls for 130 wind turbines capable of generating a maximum electric output of 468 megawatts with an anticipated average output of 183 megawatts. Construction and operation of the Project cannot begin until BOEMRE reviews and approves plans submitted by CWA that

detail construction and operation of the Project in accordance with the Rule.

Authority: The NOA of the Lease issuance is published pursuant to 30 CFR 285.231.

SUPPLEMENTARY INFORMATION:**Cape Wind Energy Project Description**

The Energy Policy Act of 2005 ("EPAct") and amendments to the OCSLA gave the Secretary of the Department of the Interior the authority to issue leases, easements, and rights-of-way for renewable energy activities on the OCS. The Secretary delegated this authority to BOEMRE, formerly the Minerals Management Service. Following passage of EPAct in 2005, CWA submitted an application for Project to BOEMRE. In 2009, BOEMRE finalized the Rule that governed the issuance of leases, easements, and rights-of-way and the regulation of offshore renewable energy activities.

The Project plan calls for 130 3.6 megawatt wind turbine generators, each with a maximum blade height of 440 feet, to be arranged in a grid pattern on the OCS in Nantucket Sound. The transmission cables for the Project, if approved, would pass through Massachusetts' submerged lands. With a maximum electric output of 468 megawatts and an average anticipated output of 183 megawatts, the Project is expected to generate electricity equivalent to three-quarters of the Cape and nearby islands' electricity needs. Each of the 130 wind turbine generators would generate electricity independently. Solid dielectric submarine inner-array cables from each wind turbine generator would interconnect within the array and terminate on an electrical service platform ("ESP"), which would serve as the common interconnection point for all of the wind turbines. The Project plan calls for a submarine transmission cable system approximately 12.5 miles in length from the ESP to a landfall location in Yarmouth, Massachusetts (7.6 miles of which would fall within the state of Massachusetts' jurisdiction).

Availability of the Lease:
