10. *Abstract:* NRC regulations in 10  
CFR part 26 prescribe requirements to  
establish, implement, and maintain  
fitness-for-duty programs at affected  
licensees and other entities. The  
objectives of these requirements are to  
provide reasonable assurance that  
persons subject to the rule are  
trustworthy, reliable, and not under the  
influence of any substance, legal or  
illegal, or mentally or physically  
impaired from any cause, which in any  
way could adversely affect their ability  
to safely and competently perform their  
duties. These requirements also provide  
reasonable assurance that the effects of  
fatigue and degraded alertness on  
individuals' abilities to safely and  
competently perform their duties are  
managed commensurate with  
maintaining public health and safety.  
The information collections required by  
part 26 are necessary to properly  
manage FFD programs and to enable  
effective and efficient regulatory  
oversight of affected licensees other  
entities. These licensees and other  
entities must perform certain tasks,  
maintain records, and submit reports to  
comply with part 26 drug and alcohol  
provisions and fatigue management  
requirements. These records and reports  
are necessary to enable regulatory  
inspection and evaluation of a licensee's  
or entity's compliance with NRC  
regulations, its FFD performance, and of  
any significant FFD-related event to  
help maintain public health and safety,

promote the common defense and  
security, and protect the environment.

the Commission) has issued renewed  
facility operating license No. DPR-49 to  
NextEra Energy Duane Arnold, LLC  
(licensee), the operator of the Duane  
Arnold Energy Center (DAEC). Renewed  
facility operating license No. DPR-49  
authorizes operation of DAEC by the  
licensee at reactor core power levels not  
in excess of 1912 megawatts thermal in  
accordance with the provisions of the  
DAEC renewed license and its technical

The factors considered in the record of decision can be found in the supplemental environmental impact statement (SEIS) for DAEC.

DAEC is a boiling-water reactor located in Palo, Iowa. The application for the renewed license complied with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. As required by the Act and the Commission's regulations in 10 CFR chapter 1, the Commission has made appropriate findings, which are set forth in the license.
