SUPPLEMENTARY INFORMATION:

Title of Collection: Revitalizing Computing Pathways (CPATH) in Undergraduate Education Program Evaluation.

OMB Number: 3145-0211.

Type of Request: Revision to an existing collection.

Abstract: The CPATH program was established by the National Science Foundation's Computer & Information Science & Engineering (CISE) division with a vision towards preparing a U.S. workforce with the computing competencies and skills imperative to the Nation's health, security, and prosperity in the 21st century. This workforce includes a cadre of computing professionals prepared to contribute to sustained U.S. leadership in computing in a wide range of application domains and career fields, and a broader professional workforce with knowledge and understanding of critical computing concepts, methodologies, and techniques. To achieve this vision, CISE/CPATH is calling for colleges and universities to work together and with other stakeholders (industry, professional societies, and other types of organizations) to formulate and implement plans to revitalize undergraduate computing education in the United States. The full engagement of faculty and other individuals in CISE disciplines will be critical to success. Successful CPATH projects will be systemic in nature, address a broad range of issues, and have significant potential to contribute to the transformation and revitalization of undergraduate computing education on a national scale. The qualitative data collection of this program evaluation will document CPATH program strategies utilized in infusing computational thinking across different contexts and disciplines, examine the development of communities of

practitioners and the dissemination of best practices around computational thinking, and analyze preliminary evidence for how the CPATH program is preparing students for career options in the STEM workforce. Five overarching evaluation questions will guide this program evaluation: (1) How is the CPATH program infusing computational thinking into a wide range of disciplines serving undergraduate education? (2) What is the evidence that university and community college departments and faculty are integrating computational thinking into their courses? (3) How are undergraduate students benefiting from participating in CPATH projects? (4) What is the evidence that the CPATH program is developing communities of practitioners that regularly share best practices across different contexts and disciplinary boundaries? (5) How is the CPATH program promoting sustainable multi-sector partnerships that represent a broad range of stakeholders (e.g., industry, higher education, K12) and contribute to workforce development that supports continued U.S. leadership in innovation? Answers to these questions are currently obtained using mixed evaluation methods including document analyses, site visit interviews, and telephone interviews with selected CPATH grant participants including principal investigators, staff, faculty, administrators, students, and external partners. This revision of the existing data collection activities will now include new protocols for interviewing faculty via phone, project evaluators, as well as edits to the previous protocols. Participation in CPATH program evaluation activities is a mandatory requirement for all CPATH awardees in accordance with the America Competes Act, H.R. 2272, and implementing directives.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 1.75 hours per response.

Respondents: Individuals.

Estimated Number of Responses per Form: 340.

Estimated Total Annual Burden on Respondents: 380 hours.

Frequency of Response: One time.

Dated: December 23, 2010.
