Discussion

The NRC published a proposed rule (75 FR 43425; July 26, 2010) that would amend its regulations in part 40 of Title 10 of the Code of Federal Regulations (10 CFR) to require that the initial distribution of source material to exempt persons or general licensees be explicitly authorized by a specific license, which would include new reporting requirements. This proposed rule would affect manufacturers and distributors of certain products and materials containing source material and certain persons using source material under general license and under exemptions from licensing. The public comment period runs through February 15, 2011.

In conjunction with the proposed rule, the NRC has developed draft implementation guidance. The draft implementation document provides guidance to a licensee or applicant for implementation of proposed 10 CFR Part 40, "Distribution of Source Material to Exempt Persons and to General Licensees and Revision of General License and Exemptions." It is intended for use by applicants, licensees, Agreement States, and NRC staff. The document describes methods acceptable to the NRC staff for implementing proposed 10 CFR part 40. The approaches and methods described in the document are provided for information only. Methods and solutions different from those described in the document are acceptable if they meet the requirements in proposed 10 CFR part 40. The guidance is provided in the form of questions and answers on

the provisions of the proposed rule. The draft implementation guidance document for proposed 10 CFR part 40 is available electronically under ADAMS Accession Number ML103160241, and can also be found at <http://www.regulations.gov> by searching on Docket ID NRC-2011-0003.

At this time, the NRC is announcing the availability for public comment of "Implementation Guidance for 10 CFR Part 40 Distribution of Source Material to Exempt Persons and to General Licensees and Revision of General License and Exemptions." The document provides guidance on implementing the provisions of proposed 10 CFR part 40, "Distribution of Source Material to Exempt Persons and to General Licensees and Revision of General License and Exemptions."

Dated at Rockville, Maryland, this 28th day of December 2010.

For the Nuclear Regulatory Commission.
