

evaluation will examine the impact of the demonstration activities on program operations, benefit usage within target households, and food security. In addition to impact measures, the evaluation will document the process and challenges of implementing the demonstrations. The results will provide valuable information should the demonstration succeed and could lead to policy changes. The evaluation will gather data through surveys from sampled eligible households during the summer and fall of 2011. A third and final household survey will be conducted in summer 2012. In the demonstration areas, roughly the same number of households with eligible children will be sampled from each of two primary strata: treatment group (participating children who have signed

up for the summer food program prior to the summer break) and control group (nonparticipating children).

Affected Public: Individuals/Households; State, Local and Tribal Government. State or tribal agencies, usually departments of education or health, oversee the administration of the SFSP which is most frequently conducted by local government, particularly local education authorities.

control parents/guardians (1 per interviewed household) in each year; and 100 State and local agency officials in each year.

Estimated Number of Responses per Respondent: There will be one interview per parent/guardian and 1 per State or local official.
