

Circular A-130, Appendix III. Security is provided for information collection, processing, transmission, storage, and dissemination in general support systems and major applications. The CIO LAN currently operates under Novell v. 4.11 and is in compliance with "CDC & ATSDR Security Standards for Novell File Servers."

The records in this System are retained and disposed of in the following way: Master records for completed studies are maintained in agency until transferred to the National Archives. Source documents for computer data are disposed of when no longer needed in the study, as determined by the system manager, and as provided in the signed consent form, as appropriate. Disposal methods include erasing computer tapes, burning or shredding paper materials or transferring records to the Federal Records Center when no longer needed for evaluation and analysis. Electronic records are maintained according to the provisions of the Records Control Schedule for NIOSH Electronic Records, which is consistent with the records maintenance requirements for other forms of records. Copies of notifications to workers/private physicians of needed medical attention and/or medical treatment are destroyed when no longer needed for administrative purposes, but may be retained for as long as seventy years. Paper records are destroyed by paper recycling process when 20 years old, unless needed for further study.

VI. OMB Control Numbers, Expiration Dates, and Titles of Information Collection

A. *Full Title*: "Morbidity Studies in Coal Mining, Metal and Non-metal Mining and General Industry, HHS/CDC/NIOSH."

OMB Control Number: 09-20-0149.

Expiration Date: TBD.

VII. Supporting Documentation

A. Preamble and Proposed Notice of System for publication in the **Federal Register**.

B. *Agency Rules*:

C. *Exemption Requested*: None.

D. *Computer Matching Report*: The new system does not require a matching report in accordance with the computer matching provisions of the Privacy Act.

[FR Doc. 2010-33021 Filed 1-24-11; 8:45 am]

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Privacy Act of 1974; Report of Modified or Altered System of Records

AGENCY: Division of Respiratory Disease Studies (DRDS), National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (DHHS).

ACTION: Notification of Proposed Altered System of Records.

SUMMARY: The Department of Health and Human Services proposes to alter System of Records, 09-20-0153, "Mortality Studies in Coal Mining, Metal and Non-metal Mining and General Industry, HHS/CDC/NIOSH." HHS is proposing to add the following Breach Response Routine Use Language to comply with the Office of Management and Budget (OMB) Memoranda (M) 07-16, Safeguarding Against and Responding to the Breach of Personally Identifiable Information:

To appropriate Federal agencies and Department contractors that have a need to know the information for the purpose of assisting the Department's efforts to respond to a suspected or confirmed breach of the security or confidentiality of information disclosed is relevant and necessary for that assistance.

These records will be maintained by the National Institute for Occupational Safety and Health (NIOSH).

DATES: Comments must be received on or before February 24, 2011. The proposed altered System of Records will be effective 40 days from the date submitted to the OMB, unless NIOSH receives comments that would result in a contrary determination.

ADDRESSES: You may submit comments, identified by the Privacy Act System of Record Number 09-20-0153:

- *Federal eRulemaking Portal*: <http://regulations.gov>. Follow the instructions for submitting comments.

- *E-mail*: Include PA SOR number 09-20-0153 in the subject line of the message.

- *Phone*: 770/488-8660 (not a toll-free number).

- *Fax*: 770/488-8659.

- *Mail*: HHS/CDC Senior Official for Privacy (SOP), Office of the Chief Information Security Officer (OCISO), 4770 Buford Highway—M/S: F-35, Chamblee, GA 30341.

- *Hand Delivery/Courier*: HHS/CDC Senior Official for Privacy (SOP), Office of the Chief Information Security Officer

(OCISO), 4770 Buford Highway—M/S: F-35, Chamblee, GA 30341.

- Comments received will be available for inspection and copying at this same address from 9 a.m. to 3 p.m., Monday through Friday, Federal holidays excepted.

SUPPLEMENTARY INFORMATION: NIOSH proposes to alter System of Records, No. 09-20-0153, "Morbidity Studies in Coal Mining, Metal and Non-metal Mining and General Industry, HHS/CDC/NIOSH." The purpose of this system is to investigate occupationally related diseases at workplaces identified as general industry, surface mining, or below ground mining operations, to determine the cause and prevention of such diseases, and to evaluate whether excess occupationally related mortality is occurring.

This System of Record Notice is being altered to add the Breach Response Routine Use Language to comply with the Office of Management and Budget (OMB) memorandum dated May 22, 2007.

The following notice is written in the present tense, rather than the future tense, in order to avoid the unnecessary expenditure of public funds to republish the notice after the System has become effective.

Dated: December 11, 2009.

James D. Seligman,

Chief Information Officer, Centers for Disease Control and Prevention.

Editorial Note: This document was received at the Office of the Federal Register on December 27, 2010.

Appendix I—Potential Sources for Determination of Vital Status and/or Last Known Address

Military records
 Appropriate State Motor Vehicle Registration Departments
 Appropriate State Driver's License Departments
 Appropriate State Government Divisions of: Assistance Payments (Welfare), Social Services, Medical Services, Food Stamp Program,
 Child Support, Board of Corrections, Aging, Indian Affairs, Worker's Compensation, Disability Insurance
 Veterans Administration files
 Appropriate employee union or association records
 Appropriate company pension or employment records
 Company group insurance records
 Appropriate State Vital Statistics Offices
 Life insurance companies
 Railroad Retirement Board
 Area nursing homes
 Area Indian Trading Posts
 Mailing List Correction Cards (U.S. Postal Service)
 Letters and telephone conversations with relatives

Letters and telephone conversations with former employees of the same establishment as cohort member
Appropriate local newspaper (obituaries)
Social Security Administration
Internal Revenue Service

Centers for Disease Control and Prevention (CDC)

National Institute for Occupational Safety and Health (NIOSH)

Mortality Studies in Coal Mining, Metal and Non-Metal Mining and General Industry

Report of Modified or Altered System of Records

Narrative Statement

I. Background and Purpose of the System

A. Background

The Department of Health and Human Services proposes to alter System of Records, No. 09-20-0153 "Mortality Studies in Coal Mining, Metal and Non-metal Mining and General Industry, HHS/CDC/NIOSH." HHS is proposing to add the following Breach Response Routine Use Language to comply with the Office of Management and Budget (OMB) Memoranda (M) 07-16, Safeguarding Against and responding to the Breach of Personally Identifiable Information:

To appropriate Federal agencies and Department contractors that have a need to know the information for the purpose of assisting the Department's efforts to respond to a suspected or confirmed breach of the security or confidentiality of information disclosed is relevant and necessary for that assistance.

B. Purpose

The purpose of this system is to investigate occupationally related diseases at workplaces identified as general industry, surface mining, or below ground mining operations, to determine the cause and prevention of such diseases, and to evaluate whether excess occupationally related mortality is occurring.

II. Authority for Maintenance of the System

Occupational Safety and Health Act, Section 20, "Research and Related Activities" (29 U.S.C. 669); Federal Mine Safety and Health Act of 1977, Section 101, "Mandatory Safety and Health Standards" and Section 501, "Research" (30 U.S.C. 811, 951); and the Public Health Service Act, Section 301,

"Research and Investigation" (42 U.S.C. 241).

III. Proposed Routine Use Disclosures of Data in the System

The Privacy Act allows us to disclose information without an individual's consent if the information is to be used for a purpose that is compatible with the purpose(s) for which the information was collected. Any such compatible use of data is known as a "routine use". The routine uses proposed for this System are compatible with the stated purpose of the System and support the agency's mission:

Data may be sent to State Vital Statistics Divisions to obtain death certificates and to missing person location agencies to find those individuals who cannot otherwise be located.

Portions of records (name, Social Security number if known, date of birth, and last known address) may be disclosed to one or more other sources selected from those listed in Appendix I, as applicable. This may be done for obtaining a determination as to whether or not an individual has died and, if alive, last known address. The purpose of determining death is so that NIOSH may obtain death certificates, which state the cause of death, from the appropriate Federal, State, or local agency. Cause of death enables NIOSH to evaluate whether excess occupationally related mortality is occurring.

Disclosure may be made to a congressional office from the record of an individual in response to a verified inquiry from the congressional office made at the written request of that individual.

In the event of litigation where the defendant is: (a) The Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Department of Justice has agreed to represent such employee, for example, in defending a claim against the Public Health Service based upon an individual's mental or physical condition and alleged to have arisen because of activities of the Public Health Service in connection with such individual, disclosure may be made to the Department of Justice to enable that Department to present an effective defense, provided that such disclosure

is compatible with the purpose for which the records were collected.

Records subject to the Privacy Act are disclosed to private firms for data entry, computer systems analysis and computer programming services. The contractors promptly return data entry records after the contracted work is completed. The contractors are required to maintain Privacy Act safeguards.

In the event of litigation initiated at the request of NIOSH, the Institute may disclose such records as it deems desirable or necessary to the Department of Justice and to the Department of Labor, Office of the Solicitor, where appropriate, to enable the Departments to effectively represent the Institute, provided such disclosure is compatible with the purpose for which the records were collected. The only types of litigative proceedings that NIOSH is authorized to request are: (1) Enforcement of a subpoena issued to an employer to provide relevant information; or (2) contempt citation against an employer for failure to comply with a warrant obtained by the Institute; and (3) injunctive relief against employers or mine operators to obtain access to relevant information.

Disclosure may be made to NIOSH collaborating researchers (NIOSH contractors, grantees, cooperative agreement holders, or other Federal or State scientists) in order to accomplish the research purpose for which the records are collected. The collaborating researchers must agree in writing to comply with the confidentiality provisions of the Privacy Act and NIOSH must have determined that the researchers' data security procedures will protect confidentiality.

The records in this System are stored in computer cards, tapes/disks and printouts, microfiche, and manual files. The records in this System are retrieved by Name and/or assigned numerical identifier, plant name and study are some of the indices used to retrieve records from this system. Social Security numbers, supplied on a voluntary basis may occasionally be used for data retrieval.

Records may be disclosed to appropriate Federal agencies and Department contractors that have a need to know the information for the purpose of assisting the Department's efforts to respond to a suspected or confirmed breach of the security or confidentiality of information disclosed is relevant and necessary for that assistance.

IV. Effects of the Proposed System of Records on Individual Rights

The routine uses proposed for this System are compatible with the stated

purpose of the System and support the agency's mission:

An individual may learn if a record exists about himself or herself by contacting the system manager at the address above. Requesters in person must provide driver's license or other positive identification. Individuals who do not appear in person must either: (1) Submit a notarized request to verify their identity; or (2) certify that they are the individuals they claim to be and that they understand that the knowing and willful request for or acquisition of a record pertaining to an individual under false pretenses is a criminal offense under the Privacy Act subject to a \$5,000 fine.

An individual who requests notification of or access to medical records shall, at the time the request is made, designate in writing a responsible representative who is willing to review the record and inform the subject individual of its contents.

The following information must be provided when requesting notification: (1) Full name; (2) the approximate date and place of the study, if known; and (3) nature of the questionnaire or study in which the requester participated.

Same as notification procedures. Requesters should also reasonably specify the record contents being sought. An accounting of disclosures that have been made of the record, if any, may be requested.

Individuals may contact the official at the address specified under System Manager above, and reasonably identify the record and specify the information being contested, the corrective action sought, and the reasons for requesting the correction, along with supporting information to show how the record is inaccurate, incomplete, untimely, or irrelevant.

V. Safeguards

The records in this System have the following safeguards in place to maintain and protect the information as it relates to Authorized users, physical and procedural safeguards:

Authorized users—Access is granted to physicians, scientists, statisticians, and designated support staff of the Centers for Disease Control and Prevention (CDC), or its contractors, as authorized by the system manager to accomplish the stated purposes for which the data in this system have been collected.

Physical Safeguards—Access to the facility is monitored, and controlled after hours, by security guard service. Hard copy records are kept in locked cabinets in locked rooms. Access to the LAN computer room is controlled by a

punch lock system. The local fire department is one mile from the facility, which is of structural steel and cement block construction, with pre-cast cement panels on the envelope. No combustible materials are used in the building construction, including all interior walls. Heat sensors are installed, and portable fire extinguishers are located throughout the computer room. The active system files are backed up on a weekly basis. The entire system is backed up, with copies of the files stored in a secure, fireproof safe in a separate location within the facility.

Procedural Safeguards—The NIOSH Local Area Network (LAN) computer system, located within the Morgantown facility, uses a security package to control unauthorized access to the system. Attempts to gain access by unauthorized individuals are automatically recorded and reviewed on a daily basis. Protection for computerized records both on the mainframe and the NIOSH Local Area Network (LAN) includes programmed verification of valid user identification code and password prior to logging on to the system, mandatory password changes, limited log-ins, virus protection, and user rights/file attribute restrictions. Password protection imposes user name and password log-in requirements to prevent unauthorized access. Each user name is assigned limited access rights to files and directories at varying levels to control file sharing. There are routine daily backup procedures and secure off-site storage is available for backup tapes. Additional safeguards may be built into the program by the system analyst as warranted by the sensitivity of the data.

Implementation Guidelines: The safeguards outlined above are in accordance with the HHS Information Security Program Policy and FIPS Pub 200, "Minimum Security Requirements for Federal Information and Information Systems." Data maintained on CDC's Mainframe and the NIOSH LAN are in compliance with OMB Circular A-130, Appendix III. Security is provided for information collection, processing, transmission, storage, and dissemination in general support systems and major applications.

The records in this System are retained and disposed of in the following way: Master records for completed studies are maintained in agency until transferred to the National Archives. Source documents for computer data are disposed of when no longer needed in the study, as determined by the system manager, and as provided in the signed consent form, as appropriate. Disposal methods

include erasing computer tapes, burning or shredding paper materials or transferring records to the Federal Records Center when no longer needed for evaluation and analysis. Electronic records are maintained according to the provisions of the Records Control Schedule for NIOSH Electronic Records, which is consistent with the records maintenance requirements for other forms of records. Copies of notifications to workers/private physicians of needed medical attention and/or medical treatment are destroyed when no longer needed for administrative purposes, but may be retained for as long as seventy years. Paper records are destroyed by paper recycling process when 20 years old, unless needed for further study.

VI. OMB Control Numbers, Expiration Dates, and Titles of Information Collection

A. *Full Title*: "Mortality Studies in Coal Mining, Metal and Non-metal Mining and General Industry, HHS/CDC/NIOSH."

OMB Control Number: 09-20-0153.

Expiration Date: TBD.

VII. Supporting Documentation

A. Preamble and Proposed Notice of System for publication in the **Federal Register**.

B. *Agency Rules*: None.

C. *Exemption Requested*: None.

D. *Computer Matching Report*: The new system does not require a matching report in accordance with the computer matching provisions of the Privacy Act.
