DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Accreditation and Approval of Bennett Testing Service, Inc., as a Commercial Gauger and Laboratory

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: Notice of accreditation and approval of Bennett Testing Service, Inc., as a commercial gauger and laboratory.

SUMMARY: Notice is hereby given that, pursuant to 19 CFR 151.12 and 19 CFR 151.13, Bennett Testing Service, Inc., 1045 E. Hazelwood Avenue, Rahway, NJ 07065, has been approved to gauge and accredited to test petroleum and petroleum products for customs purposes, in accordance with the provisions of 19 CFR 151.12 and 19 CFR 151.13. Anyone wishing to employ this entity to conduct laboratory analyses and gauger services should request and receive written assurances from the entity that it is accredited or approved by the U.S. Customs and Border Protection to conduct the specific test or gauger service requested. Alternatively, inquires regarding the specific test or gauger service this entity is accredited or approved to perform may be directed to the U.S. Customs and Border Protection by calling (202) 344-1060. The inquiry may also be sent to cbp.labhq@dhs.gov. Please reference the Web site listed below for a complete listing of CBP approved gaugers and accredited laboratories.

http://cbp.gov/xp/cgov/import/operations_support/labs_scientific_svcs/commercial_gaugers/

DATES: The accreditation and approval of Bennett Testing Service, Inc., as commercial gauger and laboratory became effective on September 20, 2010. The next triennial inspection date will be scheduled for September 2013.

FOR FURTHER INFORMATION CONTACT: Anthony Malana, Laboratories and Scientific Services, U.S. Customs and Border Protection, 1300 Pennsylvania Avenue, NW., Suite 1500N, Washington, DC 20229, 202-344-1060.

BILLING CODE 9111-14-P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Notice of Issuance of Final Determination Concerning the Engenio 7900 Storage System

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: Notice of final determination.

SUMMARY: This document provides notice that U.S. Customs and Border Protection ("CBP") has issued a final determination concerning the country of origin of the Engenio 7900 Storage System (the 7900 System). Based upon the facts presented, CBP has concluded in the final determination that Mexico is the country of origin of the 7900 System for purposes of U.S. Government procurement.

DATES: The final determination was issued on January 19, 2011. A copy of the final determination is attached. Any party-at-interest, as defined in 19 CFR 177.22(d), may seek judicial review of this final determination on or before February 25, 2011.

FOR FURTHER INFORMATION CONTACT: Heather K. Pinnock, Valuation and Special Programs Branch: (202) 325-0034.

SUPPLEMENTARY INFORMATION: Notice is hereby given that on January 19, 2011, pursuant to subpart B of part 177, Customs Regulations (19 CFR part 177, subpart B), CBP issued a final determination concerning the country of origin of the 7900 System which may be offered to the U.S. Government under an undesignated government procurement contract. This final determination, in HQ H125975, was issued at the request of LSI Corporation, under procedures set forth at 19 CFR part 177, subpart B, which implements Title III of the Trade Agreements Act of 1979, as amended (19 U.S.C. 2511-18). In the final determination, CBP concluded that, based upon the facts presented, the 7900

System, assembled to completion in Mexico from components made in non-TAA countries and TAA countries and programmed with U.S.-origin software in Mexico, is substantially transformed in the Mexico, such that Mexico is the country of origin of the finished system for purposes of U.S. Government procurement.

Section 177.29, Customs Regulations (19 CFR 177.29), provides that notice of final determinations shall be published in the **Federal Register** within 60 days of the date the final determination is issued. Section 177.30, CBP Regulations (19 CFR 177.30), provides that any party-at-interest, as defined in 19 CFR 177.22(d), may seek judicial review of a final determination within 30 days of publication of such determination in the **Federal Register**.

Dated: January 21, 2011.

Sandra L. Bell,

Executive Director, Regulations and Rulings, Office of International Trade.

RE: Government Procurement; Country of Origin of the LSI Engenio 7900 Storage System: Substantial Transformation

Dear Ms. Crosby:

This is in response to your letter dated September 24, 2010, requesting a final determination on behalf of LSI Corporation ("LSI"), pursuant to subpart B of part 177 of the U.S. Customs and Border Protection Regulations (19 C.F.R. Part 177). Under these regulations, which implement Title III of the Trade Agreements Act of 1979 (TAA), as amended (19 U.S.C. § 2511 et seq.), CBP issues country of origin advisory rulings and final determinations as to whether an article is or would be a product of a designated country or instrumentality for the purposes of granting waivers of certain "Buy American" restrictions in U.S. law or practice for products offered for sale to the U.S. Government.

This final determination concerns the country of origin of the Engenio 7900 Storage System (7900 System). We note that as a U.S. importer and manufacturer, LSI is a party-at-interest within the meaning of 19 C.F.R. § 177.22(d)(1) and is entitled to request this final determination.

FACTS:

According to the information submitted, the 7900 System is an electronic data storage system that ensures data integrity and availability. The system offers drive-level encryption, multiple replication options, proactive drive health monitoring, RAID¹ 6 technology and persistent cache backup to ensure that data is fully protected. Together these features help LSI customers optimize storage performance, reduce operational costs and more efficiently manage both physical and virtual environments. The 7900 System can support transactional applications, such as database and online transaction processing, as well as throughput-intensive applications, such as high performance computing and rich media. To support these varied applications, the 7900 System is designed to be highly configurable, although certain system features are standard.

For purposes of this request, the Wembley configuration has been put forward as representative of the 7900 System and is described as having the following components:

- An Engenio Operating System (EOS). It features a complex and sophisticated code base including a RAID data protection layer, with stored data protected from loss due to power failure, component failure and other such events. The EOS also includes a graphical user interface that allows users to manage the storage array in the system, adjust system settings, and perform management tasks while the system is online. The EOS is unique to LSI products and the 7900 System could not function without the EOS, which represents approximately 45 percent of the overall development cost for the 7900 System. The country of origin of the EOS is the United States.
- A controller assembly, which transmits commands to hard drives and relays data to and from hard drives. The controller is programmed by the supplier with basic firmware that provides generic functionality to ensure that the controller works. The country of origin is Thailand.
- A mounting assembly, which secures the controller assembly. The country of origin is Mexico or China.
- A set of Hard Drives, which provides high-capacity data storage. The country of origin is Thailand.
- A Slot Drive Module Assembly, which secures and organizes the hard drives. The country of origin is Mexico or Malaysia.

¹ Redundant Array of Independent Disks.
